

# Critical Thinking Chapter 2 Notes

Critical thinking requires us to (1) **detect errors** in our thinking, (2) **restrain attitudes and feelings** that can distort our reasoning, and (3) achieve a level of **objectivity** that makes critical thinking possible.

Doing this requires- **awareness, motivation, and practice.**

**Awareness-** of what is involved in good critical thinking and sloppy thinking.

**Practice-** to avoid pitfalls,

**Motivated-** to do all of the extra effort to think critically.

## COMMON BARRIERS TO CRITICAL THINKING

- (1) Those hindrances that arise because of **how** we think
- (2) Those that occur because of **what** we think

Category 1 barriers come into play because of psychological barriers

Category 2 barriers are those that arise because of certain philosophical ideas we have

## Category 1: HOW WE THINK

We all have psychological tendencies and habits that affect our behavior and channel our thinking.

### PROTECTING OURSELVES

We may decide to accept a claim solely on the grounds that it advances, or coincides with our interests. Example "I am against all forms of gun control because I am a hunter".

Consequences of self-centered thinking, or thinking in only four interests can prevent careful evaluation of claims, limit critical inquiry, blind you from facts, provoke self-deception, encourage rationalizations, lead you to suppress or ignore evidence, and promote wishful thinking.

Tendency towards self-centered thinking can leave you wide open to propaganda and manipulation by people who appeal to your personal desires and prejudices.

To avoid the excessive influence of your own needs:

- (1) Watch out when things get personal
- (2) Be alert to ways critical thinking can be undermined
- (3) Ensure nothing has been left out
