nations wherein the population generally comes together to defend its borders and is united by a common national goal civil
wars tear countries apart divide families and turn neighbors against each other Civil wars are a form of self harm in which a
country's people seek redemption through self destruction punishing or severing those parts that are seen to have made the
nation ill And yet civil wars with their characteristically appalling violence remain chillingly common defying the notion that
they are somehow an aberration In The Grammar of Civil War Will Fowler examines the origin process and outcome of civil
war Using the Mexican Civil War of 1857-61 or the War of the Reform the political and military conflict that erupted between
the competing liberal and conservative visions of Mexico's future Fowler seeks to understand how civil wars come about and
when they do how they unfold and why By outlining the grammatical principles that underpin a new framework for the study
of civil war Fowler stresses what is essential for one to take place and explains how once it has erupted it can be expected to
