Social Justice and the City Nik Heynen, 2020-06-09 This special collection aims to offer insight into the state of geography on questions of social justice and urban life While using social justice and the city as our starting point may signal inspiration from Harvey's 1973 book of the same name the task of examining the emergence of this concept has revealed the deep influence of grassroots urban uprisings of the late 1960s earlier and contemporary meditations on our urban worlds Jacobs 1961 1969 Lefebvre 1974 Massey and Catalano 1978 as well as its enduring significance built upon by many others for years to come Laws 1994 noted how geographers came to locate social justice struggles in the city through research that examined the ways in which material conditions contributed to poverty and racial and gender inequity as well as how emergent social movements organized to reshape urban spaces across diverse engagements including the U S Civil Rights Movement anti war protests feminist and LGBTQ activism the American Indian Movement and disability access This book originally published as a special issue of Annals of the American Association of Geographers **Essential Criminology** Stuart Henry, Desiré J. M. Anastasia, 2025-04-09 This significantly expanded edition of Essential Criminology covers the broadest range of criminological theories the essential criminological theories from longstanding ones such as classical theory and strain theory to recently introduced ones such as ultra realism and green cultural criminology Whether all are essential depends on one's theoretical stance The value of this text is its carefully designed comparative analysis which helps readers consider their relative contribution to the field Originally designed as an alternative to lengthy and expensive introductory

Climate Technology, Gender, and Justice Tina Sikka, 2018-12-14 This book is the first to undertake a gendered analysis of geoengineering and alternative energy sources Are either of these technologies sufficiently attendant to gender issues Do they incorporate feminist values as articulated by the renowned social philosopher Helen Longino such as empirical adequacy novelty heterogeneity complexity and applicability to human needs The overarching argument in this book contends that while mitigation strategies like solar and wind energy go much further to meet feminist objectives and virtues geoengineering is not consistent with the values of justice as articulated in Longino s feminist approach to science This book provides a novel feminist argument in support of pursuing alternative energy in the place of geoengineering It provides an invaluable contribution for academics and students working in the areas of gender science and climate change as well as policy makers interested in innovative ways of taking up climate change mitigation and gender
