governments provide a wide array of highly technical urban services. Gaining a rudimentary understanding of them can be a daunting challenge for students as well as new and inexperienced public servants. *Handbook of Urban Services* is designed to help meet this challenge. In language that will make the fundamentals clear to non specialists, this practical handbook provides concise overviews of 17 core local government services in four functional areas: public Safety and Health Services (Police, fire, emergency management, emergency medical, animal control, and public health); Public Works and Planning Services (Planning and inspections, water treatment and distribution, wastewater and stormwater management, street maintenance, and construction); solid waste collection and disposal; and forestry. Leisure Services (Parks and recreation, and libraries) and Support Services (Public equipment, public buildings, and public facilities). Each chapter begins with a brief history of the service, followed by a discussion of effective management practices and policies. Chapter ending bibliographies refer the reader to sources with more in depth treatment.

*Planning Cities With Young People and Schools* Deborah L. McKoy, Amanda Eppley, Shirl Buss, 2021-11-29. Offering the overlooked but essential viewpoint of young people from low income communities of color and their public schools. *Planning Cities With Young People and Schools* offers an urgently needed set of best practice recommendations for urban planners to change the status quo and reimagine the future of our cities for and with young people. Working with more than 10 000 students over two decades from the San Francisco Bay Area to New York to Tohoku Japan, this work produces a wealth of insights on issues ranging from environmental planning, housing, transportation, regional planning, and urban education. Part I presents a theory of change for planning more equitable, youth friendly cities by cultivating intergenerational communities of practice where young people work alongside city planners and adult professionals. Part II explores youth engagement in resilience, housing, and transportation planning through an analysis of literature and international examples of engaging children and youth in city planning. Part III speaks directly to practitioners, scholars, and students alike, presenting Six Essentials for Planning Just and Joyful Cities as necessary precursors to effective city planning with and for our most marginalized children, youth, and public schools. For academics, policy makers, and practitioners, this book raises the importance of education systems and young people as critical to urban planning and the future of our cities.

*Urban Environment, Travel Behavior, Health, and Resident Satisfaction* Anzhelika Antipova, 2018-05-09. This book explores the intersections of urban development, travel patterns, and health. Currently, there is a lack of research concerning the subjective dimensions of accessibility in urban environments and travel behavior, as well as travel related outcomes. Antipova fills this gap in the scholarship by developing an analysis of satisfaction and perception related indicators at an intraurban level. Specifically, she investigates various aspects of urban environment from the perspective of resident perception and satisfaction, as well as the relationship between urban environment, travel behavior, activity patterns, and traveler health.

*Contemporary Urban Design Thoughts in China* Jin Duan, Jinhua Liu, 2022-07-08. This book proposes and systematically discusses four trends of thoughts in contemporary Chinese urban design. As the first book

to systematically introduce contemporary Chinese urban design thoughts this book objectively displays the macroscopic picture of contemporary urban design development of China from the time dimension sorting out seven historical stages and three disputes This book is mainly divided into two parts The first part focuses on the vertical description taking the major events in the seven historical stages as the context combing the macro picture of the development of contemporary urban design in China in the last 100 years and describing the three controversies in this process contention subject and legalization The second part focuses on horizontal observations puts forward and systematically discusses the four trends of thought formed in the development of contemporary urban design in China including Design of Form Synthesis of Design Control of Design and Design of Rule This part discusses their development background theoretical support and key concepts in detail and finally conducts critical thinking The whole book is based on historical events archives and papers published in Chinese academic journals While sorting out summarizing and objectively discussing it also makes a critique of urban design activities and academic thinking in China which will greatly benefit scholars and readers who are interested in urban design history of contemporary China
