Continuous Assessment In Efl Classes:

Continuous Assessment in EFL Classes Wondimale Geneti Telila, 2014-12-13 Teaching and assessment are highly interwoven. The assessment methods used in classrooms influence the teaching learning process either positively or negatively. Continuous assessment makes assessment more meaningful and more representative of the learners' overall abilities. Since it involves data gathering over a long period of time, it yields more accurate data reaching the teachers early enough to modify instruction. It also captures the full range of learners' performance. It employs a variety of assessments, uses a formative approach, emphasizes progress toward specific levels of mastery, and provides constructive feedback to students. However, some challenges can exist in implementing continuous assessment. This book thus attempts to explore opportunities and challenges in using continuous assessment in English as Foreign Language classes at tertiary level. The Cambridge Guide to Second Language Assessment Christine Coombe, 2012-01-30 The Cambridge Guide to Second Language Assessment aims to present in one volume an up-to-date guide to the central areas of assessing the second language performance of English by speakers of other languages. This volume provides snapshots of significant issues and trends that have shaped language assessment in the past and highlights the current state of our understanding of these issues.

Washback of Continuous Assessment in EFL Classrooms in Saudi Arabia Saad Fahad Aldawood, 2016 **Functions of Written Tests in EFL Classes in Primary School** Viktoryia Schulz, 2019-06-19 Seminar paper from the year 2019 in the subject Didactics for the subject English Pedagogy Literature Studies grade 10 University of Frankfurt Main Institut für England und Amerikastudien course Testing Evaluating and Assessment Theory into Practice language English abstract The term paper focuses on written tests and their functions in EFL classes in primary school. Regarding the peculiarities of EFL classes in primary classroom, the main function of written tests will be outlined. Bräuner and Edelhoff specify the functions of written tests in primary school. They point out diagnostic, forward guidance, comparison, and value judgement functions. In the course of the term paper, the exemplary written test is investigated regarding its diagnostic function. The subject English as a foreign language (EFL) belongs since 2005/2006 to the curriculum of primary school in whole Germany. The EU research study of 2007 on early language learning education quality and pedagogical principles states that early foreign language acquisition is favoured over the late one, as the younger students are intrinsically motivated and have a positive attitude to the EFL acquisition process. EFL acquisition in primary school usually begins in the third grade and aims to provide the first experiences with learning a foreign language. Nevertheless, these first experiences are to be assessed, and the students are to be provided with feedback. This procedure demands a large amount of effort and reflection time on the teacher's side, considering the communicative character and some other peculiarities of EFL classes in primary school. Correspondingly, the topic challenges many teachers while teaching EFL in primary classroom. Therefore, the ways to facilitate this challenge are sought. A written test is an assessment form that manages the challenge and can be easily used in primary school.

Constructively the exemplary test will be reviewed if this specific function is realised Therefore the central question of the term paper is how far the exemplary test aids the realisation of the diagnostic function The analysis and the following reflection of the exemplary test are grounded on the sources Brown and Abeywickrama Language Assessment Principles and Classroom Practices and of K hler and Roters Embracing Everyone Inklusiver Fremdsprachenunterricht Language Education During the Pandemic Wissia Fiorucci,2023-10-27 This edited book explores and illustrates successful practices for online assessment and community building based on the authors own classroom practice during and in the immediate aftermath of the pandemic The authors argue that what has happened during the coronavirus pandemic has fundamentally changed perspectives on language education and that if the importance of using online teaching tools in the classroom was dimly understood before the crisis the language teaching establishment has now fully realized their potential and must continue exploring this further even as the option to return to in person teaching becomes widespread Ranging from online activities to course design the volume presents a comprehensive outlook at distance learning in modern foreign languages It does so by focusing on those two aspects that within an emergency scenario have proven most challenging namely how to assess students in a non controlled environment and how to foster a sense of community from the confinement of our isolated learning spaces This book will be of interest to academics and practitioners in Language Education as well as teachers and teacher trainees

Perceptions and Difficulties of Students in Large EFL Classes Yirgalem Girma,2023-03-17 Seminar paper from the year 2023 in the subject Pedagogy General grade 3 81 language English abstract This study was aimed at assessing students perceptions of large EFL class in terms of the instructional psychological and social aspects and perceived challenges The study adopted the descriptive research approach Two preparatory schools were selected owing to their convenience and the serious situational constraints in teaching large EFL large classes Ethiopia The data were collected using likert scale questionnaires and semi structured interviews Eight randomly selected EFL teachers filled open ended and close ended questionnaire Out of 1545 155 students were selected using simple random sampling technique Ten students were voluntarily selected and interviewed The quantitative data were analyzed through descriptive statistics but qualitative data gathered via interview were analyzed descriptively The findings showed that most participants had clear picture of the situational challenges and benefits of EFL large class The majority of the respondents perceived the instructional and psychological aspects negatively but the social aspects favorably The EFL teachers and most students perceived that learning in EFL large class affects English learning outcomes and large EFL class matters beyond quality of instructions The perceived difficulties of large EFL class were lack of continuous assessment getting immediate feedback to students avoidance of writing and speaking focusing on usage low active involvement less students learning lack of rapport no use of teaching aids teachers failure active learning and motivational strategies lack of motivation concentration confidence and student teacher interaction The constraints can be alleviated using effective instructional strategies class size reduction and
