brief survey of the furniture of the world as science sees it including causes laws dispositions and force fields as well as material things Franklin describes colorful examples of discoveries in the natural mathematical and social sciences and the reasons for believing them He examines the limits of science giving special attention both to mysteries that may be solved by science such as the origin of life and those that may in principle be beyond the reach of science such as the meaning of ethics What Science Knows will appeal to anyone who wants a sound readable and well paced introduction to the intellectual edifice that is science On the other hand it will not please the enemies of science whose willful misunderstandings of scientific method and the relation of evidence to conclusions Franklin mercilessly exposes **The Lincoln Library of Essential Information an Up to Date Manual for Daily Reference, for Self Instruction, and for General Culture Named in Appreciative Remembrance of Abraham Lincoln, the Foremost American Exemplar of Self Education** ,1924
