Cool Science Toys To Make:

Make Fun! Bob Knetzger, 2016-03-22 You don't need to own a factory to make toys. Author and toymaker Bob Knetzger has been making fun stuff all his life with simple technology like vacuum forming and mold making. In an age where makers are tantalized by the capabilities of 3D printers and other digital fab technology, this book takes you back to old school hand tools, simple electronics, and working with metal and plastic to make toys every bit as good as those you can find in a big box store. This book has something for everyone, from a marble maze to a talking booby trap, from custom cookie cutters to an EZ Make oven. Discover the basic principles of science, electronics, and engineering through hands-on projects that range from easy to more challenging and are always fun. *How To Make Science Toys: Ship & Submarine*, Maruza, 2016-08-23 This book is a complete guide to build model boat and submarine with electric power and made of household material such as polystyrene, drinking straw, rubber band, zinc plate, etc. Boat and submarine are an application of Archimedes' principle. This book guides reader to build science toys to learn and practice Archimedes' principle. Beside Archimedes' principle, hydrodynamic, the study of liquids in motion, also becomes a major consideration to ensure boat and submarine to perform well. Hydrodynamic not only determines boat and submarine body design, it determines also propeller design. By understanding about Archimedes' principle and hydrodynamic, the submarine can be set to dive, hover in water, and resurface.
