

CARDIAC CATHETERIZATION

Definition

Cardiac Catheterization is a special study of the heart and the blood vessels that supply blood to the heart muscle. During a cardiac cath a long thin flexible catheter, is inserted into an artery or vein in the groin or arm. While watching the catheter on x-ray, the catheter is then passed through the artery or vein to the heart. Once the catheter is in place, pressures in the heart are measured. An x-ray angiogram (motion picture x-ray) of the heart and blood vessels is taken. This is done while injecting an iodinated colorless "dye" or contrast material through the catheter. An angiogram of the coronary arteries is obtained by injecting the contrast material into the opening of a coronary artery. X-ray movies are taken during the injection of the contrast material allowing the blood flow through the coronary arteries to be visualized.

Risk & complication

- Allergic reactions to the contrast or medication
- Bleeding
- Heart Attack
- Stroke
- Kidney Damage
- Infection
- Bruising at the puncture site
- Irregular heart rhythms
- Blood Clots
- Damage to the artery wall and where the catheter was inserted
- Damage to the heart tissue

Procedure

Planning Ahead

- You will be scheduled to see the cardiologist before the procedure. The doctor will give you instructions for preparation and review risks involved with the procedure. Please ask questions if you don't understand.
- Inform your doctor of all the medicines you take, including all over the counter medications and vitamin supplements. Inform your doctor if you take any oral medicines or insulin for diabetes. Inform your doctor if you are allergic to iodine or radio contrast ("X-Ray dye").
- A nurse will call you within 2 days before the scheduled procedure to give you specific instructions and to answer any questions.
- You will be given a hospital gown to wear.

Cardiac Catheterization Lab Manual

Cardiac Catheterization Lab Manual:

Congenital Heart Disease P. Syamasundar Rao, 2012-01-18 There are significant advances in the understanding of the molecular mechanisms of cardiac development and the etiology of congenital heart disease CHD However these have not yet evolved to such a degree so as to be useful in preventing CHD at this time Developments such as early detection of the neonates with serious heart disease and their rapid transport to tertiary care centers availability of highly sensitive noninvasive diagnostic tools advances in neonatal care and anesthesia progress in transcatheter interventional procedures and extension of complicated surgical procedures to the neonate and infant have advanced to such a degree that almost all congenital cardiac defects can be diagnosed and corrected Treatment of the majority of acyanotic and simpler cyanotic heart defects with currently available transcatheter and surgical techniques is feasible effective and safe The application of staged total cavo pulmonary connection Fontan has markedly improved the long term outlook of children who have one functioning ventricle This book I hope will serve as a rich source of information to the physician caring for infants children and adults with CHD which may help them provide optimal care for their patients

Invasive Cardiology Sandy Watson, Kenneth Gorski, 2010-10-15 Completely revised and updated Invasive Cardiology A Manual for Cath Lab Personnel Third Edition is the first and only book written specifically by and for nurses and technicians Topics include ECG interpretation intracardiac pressure measurement radiography intracoronary Doppler intravascular ultrasound duties of technical staff angiography and cardiac catheterization PTCA stents atherectomy laser nursing care valvuloplasty and balloon pericardiectomy electrophysiology cardiac pacing endomyocardial biopsy foreign body retrieval pediatric interventional cardiology cardiac pharmacology and cath lab emergencies

Introductory Guide to Cardiac Catheterization Arman T. Askari, Medhi H. Shishehbor, Adrian W. Messerli, Ronnier J.
