

## **CHAPTER 22**

### **Contract Costing**

---

#### **Meaning**

Contract Costing is a special type of job costing where the unit of cost is a single contract. Contract itself is a cost centre and is executed under the customer's specifications. Contract Costing is defined by the I C M A Terminology as "that form of specific order costing which applies where work is undertaken to customer's special requirements and each order is of long duration. The work is usually of constructional nature."

Contract Costing is also termed as "Terminal Costing." The principles of job costing are applicable to contract costing and is used by such concerns of builders, public works contractors, constructional and mechanical engineering firms and ship builders etc. who undertake work on a contract basis.

#### **SPECIAL FEATURES OF CONTRACT COSTING**

The following are the special features of Contract Costing:

- (1) The cost unit is a specific contract.
- (2) Each contract takes a long time to complete.
- (3) The work being of a constructional nature, the same is executed at customer's site, as per his specifications.
- (4) Bulk of the materials purchased and delivered direct to the contract site or obtained from the central stores through the requisition slips.
- (5) Generally specific portions of the contract are given to sub-contractors.
- (6) Most of costs which are normally treated as indirect can be identified specifically with a particular contract and are charged to it as direct costs.
- (7) Overheads constitute only a very small proportion of the cost of the contract. However, indirect costs consist mainly of administrative cost of the central office.
