Chapter 1section The Marshall Plan:

America and the China Threat Paolo Urio,2020-01-01 The US has historically disguised to itself and to others the true nature of its relations with those nations that stood in the way of its ambitions Reversing the order of cause and effect it has projected fear of harm from other nations even as it was expanding its dominion over them With the collapse of the Soviet Union which was so to be feared that the American people could even be told they would be better dead than Red the US rejoiced in the belief that the world was at last under its uncontested leadership celebrating Francis Fukuyama s then acclaimed book *The End of History* and proclaiming perhaps even believing that it alone can assure peace stability and prosperity in the international system However at the beginning of the 21st century a formidable new competitor emerged China Now we hear the fear stoked mantra The Chinese are coming But is China really a threat to the US or just to its sole superpower status This book debunks among many others the myth of the universality of US values and the myth of the imperial dictatorial and state capitalist character of today s China It explains the division between the US and China through an historical analysis of their ideologies It reveals the source of the extraordinary difficulty the US faces in adapting to the changes occurring in the international system inter alia the firm belief in its exceptionalism and good intentions By contrast the Chinese ideology while also possessing a remarkable internal coherence through time has achieved greater flexibility by integrating values imported from the West and several Confucian values to form a new ideology better able to adapt its public policies to changes in the national and the international environments China s significant military and economic advances are addressed along with its new investments and One Belt One Road Initiative

From International to Federal Market Robert Schütze, 2017-08-11 What are the different market types that shape the European Union's internal market Schütze proposes three models that assist in explaining the transitions in the structure of the EU internal market The international model demands that each state limits its external sovereignty while retaining internal sovereignty over its national market The federal model declares that within a common market states must lose a part of their internal sovereignty and in accordance with the principle of home state control goods are entitled to be sold freely on a foreign market in compliance with home state law The national model proposes that the trade restrictions above a legislative or judicial Union standard should be removed Schütze's book analyses the changing structure of European law in relation to the European internal market The General Part starts out by offering a historical analysis of the relationship between international law and market coordination up to the twentieth century but also provides an in-depth analysis of the constitutional principles which controlled the integration of the US common market The Special Part then specifically addresses the decline of the international model in relation to the EU internal market and the corresponding rise of a federal market philosophy after *Cassis de Dijon* The final chapter explores the exceptional constitutional principles that apply to fiscal matters This is the second volume in Schütze's trilogy on the Changing Structure of European Law Exploring the changing structure of negative integration in the past 60 years the book complements his previous volume *From Dual to Cooperative Federalism* which analysed the evolving structure of positive integration A third volume will finally explore the formal constitutional aspects in the evolution of the European Union into a federal union of States
