

Social Change

- Social Change is the process by which the structures and functions of social systems and social behavior are modified and altered.
- All societies are involved in a process of social change; however, this change may be so subtle and slow that society is hardly aware of it
- The opposite of social change is social continuity which means that there are structures within society which are built to resist change. Example - the Catholic Church

Theories of Social Change

1. Evolutionary Theory:

The basic assumption of this theory is that change is the characteristic feature of human society. The present observed condition of the society is presumed to be the result of change in the past. Another assumption is that change is inevitable or it is 'natural'.

2. Cyclical Theory:
