

Chapter 24 Study Guide

Section 1

Vocabulary:

Peninsulares: The top of the Spanish-American society who were people who had been born in Spain.

Creoles: The second highest in the social rank. The only difference between them and the Peninsulares was that they could not hold high office in Spanish colonial government.

Mulattos: People of mixed European and African ancestry.

Simon Bolivar and Jose de San Martin: they were two brilliant Creole generals who lead the wars of independence in South America.

Miguel Hidalgo: A priest in Mexico who believed in Enlightenment ideas and took the first step toward independence by calling a rebellion against the Spanish. Hidalgo was defeated in 1811.

Jose Maria Morelos: Led the revolution in Mexico for four years but was defeated in 1815.

Main Ideas:

- The Spanish colonies were divided into different social classes, and because only peninsulares could hold government jobs, this kept the Spanish in control of these colonies
- Haiti's revolution was lead by Toussaint L'Overture how was enslaved but rose to become a skilled general and diplomat. By 1801 he had taken control of the entire island and freed the slaves
 - In 1791 100,000 slaves revolted against their masters
 - In 1802 Toussaint agreed to halt the revolution if the French ended slavery. This was agreed to but Toussaint was thrown in jail where he died
- Revolts started after Napoleon but his brother as king of Spain. The Creoles didn't feel loyalty to a king imposed by the French. They argued that when the real king was removed, power shifted to the people.
- Most of Latin America won its victories because of Simon Bolivar and San Martin
 - Bolivar's army of revolutionaries suffered numerous defeats but then in 1819 Bolivar led over 2000 soldiers on a march through the Andes and present day Colombia. Coming from this direction he won by surprise against the Spanish. Because of this Venezuela declared independence from Spain in 1811. San Martin and Bernardo O'Higgins led an army on a march across the Andes to Chile in 1817 where they attacked the Spanish and freed Chile. Then San Martin left his army for Simon Bolivar.
- Mexico won independence in 1821
 - Miguel Hidalgo and Jose Maria Morelos helped start it.

Gordon,1998 Examcart Sainik School Class 6 Study Guide Book For 2025 Entrance Exam In English Examcart Experts, Starlight Starbright: Are Stars Conscious? Second Edition Greg Matloff,C Bangs,2020-05-07 The only thing we can be absolutely sure of is our own consciousness But what is consciousness Is it a property that is unique to humans or do we share it with other lifeforms Or is the philosophical doctrine of panpsychism correct are stars and the entire universe conscious in some sense Early chapters in this book examine the prehistory mythology and history of this topic Arguments are presented from the viewpoints of shamans philosophers poets quantum physicists and novelists A simple toy model of panpsychism is then presented in which a universal field of proto consciousness interacts with molecular bonds via the vacuum fluctuation pressure of the Casimir Effect It is shown how this model is in congruence with an anomaly in stellar motions called Parenago s Discontinuity Cool redder less massive stars such as the Sun apparently circle the center of the galaxy faster than their hotter bluer more massive sisters This discontinuity occurs at the point in the stellar distribution where molecules begin to appear in stellar spectra As described in the first edition of this book observations of main sequence stars out to 260 light years and giant stars out to 1 000 light years using the ESA Hipparcos space observatory support the reality and non locality of Parenago s Discontinuity Local more conventional explanations for this phenomenon are not supported by observations of other galaxies and the spiral arms of the Milky Way Since 2014 the new ESA Gaia space observatory has been obtaining kinematics and position data for 1 billion stars in our galaxy The first Gaia data release in 2016 has been used in 2018 by a Russian team to demonstrate Parenago s Discontinuity for a large stellar sample out to 500 light years from the Sun These observations support the hypothesis that anomalistic stellar motion is due to stellar volition as described by philosopher author Olaf Stapledon in his classic novel *Star Maker* as previously discussed by the author in the peer reviewed *Journal of the British Interplanetary Society JBIS* In light of the new Gaia observations and work by other researchers it is not impossible that panpsychism is emerging from the realm of philosophy as a new subdivision of observational astronomy Simple models of universal proto consciousness may be subject to inductive tests using current and future space observatories A special feature of this book is the chapter frontispiece art by C Bangs **Study Guide for the Telecourse Project Universe** Joel M.
