

Lesson 21 Student Activity Sheets: Are there differences inside the birds that would explain why they behave differently?

PART A

1. Summarize the responses to your partner discussion (Choose one to write about).

Questions for partner discussion:

- (1) What are some of the types of evidence that we looked at last time that convinced us that boldness differences in juncos are inherited?
- (2) While we concluded that this evidence that boldness differences between the UCSD juncos (city birds) and the mountain birds was inherited, what new question did this raise for us?
- (3) When we compared how physical traits are inherited: "inherited alleles → substances produced → physical trait variations" it helped us generate some new ideas for how alleles might affect behavior. What were some examples of "substances affecting behavior" that we came up with last time?

Some of the types of evidence that we looked at last time that convinced us that boldness differences in juncos are inherited are watching their behavior over time.

2. Summarize your responses to a few of these questions below (you pick which ones):

- *What was this study trying to figure out?*
- *What kinds of measurements were they collecting?*
- *Can we tell just based on this what the scientists were actually DOING in their experiment(s)?*
- *What did you learn that was new or unexpected?*
- *What new questions did you come away with?*

In part A, the researchers are trying to their bodies and how they respond to these stressors with with both hormonal and behavioral changes.

PART B

3. What patterns do you notice in the (a) field study data?

We notice that in the field study data, it talks about the comparisons researchers made between different juncos. (juncos from Mt Laguna and San Diego). It also talks about Cort (corticosterone).
