One American's Story

Seventy miles south of Berlin, Joseph Polowsky and a patrol of American soldiers were scouting for signs of the Soviet army advancing from the east. As the soldiers neared the Elbe River, they saw lilacs in bloom. Polowsky later said the sight of the flowers filled them with joy.

Across the Elbe, the Americans spotted Soviet soldiers, who signaled for them to cross over. When the Americans reached the opposite bank, their joy turned to shock. They saw to their horror that the bank was covered with dead civilians, victims of bombing raids.

A PERSONAL VOICE JOSEPH POLOWSKY

"Here we are, tremendously exhilarated, and there's a sea of dead. . . . [The platoon leader] was much moved. . . . He said, 'Joe, let's make a resolution with these Russians here and also the ones on the bank: this would be an important day in the lives of the two countries.' . . . It was a solemn moment. There were tears in the eyes of most of us. . . . We embraced. We swore never to forget."

—quoted in *The Good War*

The Soviet and U.S. soldiers believed that their encounter would serve as a symbol of peace. Unfortunately, such hopes were soon dashed. After World War II, the United States and the Soviet Union emerged as rival superpowers, each strong enough to greatly influence world events.

U.S. and Soviet troops met at the Elbe River, April 1945.

American and Soviet soldiers meet (top) at the Elbe River in Germany near the end of World War II. A 1996 postage stamp (above) commemorates the historic meeting.

Former Allies Clash

The United States and the Soviet Union had very different ambitions for the future. These differences created a climate of icy tension that plunged the two countries into a bitter rivalry.

Chapter 2guided Reading Origins Of The Cold War:

The Vietnam War from the Rear Echelon Timothy J. Lomperis, 2023-04-21 Timothy Lomperis knows the Vietnam War both as a soldier and as a scholar. In the latter role he has published extensively including *The War Everyone Lost and Won* hailed as one of the best books ever written on that conflict. Even though he served two tours in country during the war's most frustrating period from the infamous Easter Invasion through the Paris Peace negotiations, this is the first time he has written about the war from such a personal perspective. An intelligence officer at the Military Assistance Command Vietnam (MACV), Lomperis and his comrades were tasked with translating Washington war policy into action. Lomperis provides a rare view of the war from the perspective of a rear echelon officer. He and other so-called REMFs were deeply involved in trying to devise and implement strategies that would win the war. This largely neglected perspective takes center stage in Lomperis's memoir, presenting a seldom-seen midlevel perspective that provides the missing links between the Washington-Hanoi peace negotiations and the deadly battles between troops in the field. In exposing the inner workings of a military headquarters during wartime, Lomperis recounts the tensions of a command caught between the political imperatives of Washington and the deteriorating military situation on the ground. Involved in the planning and execution of Nixon's 1972 Christmas Bombing Campaign designed to push the North Vietnamese into peace negotiations, Lomperis sheds new light on Nixon's secret plan to end the war while offering rare glimpses of military operations and decision making on the ground in Saigon. Giving color to the REMF story, he also offers a portrait of life in wartime Saigon, writing with genuine respect for and curiosity about Vietnamese culture. And ultimately, he describes his own moral conundrum as the son of missionaries and an initial Cold Warrior who undergoes a gradual disillusionment that resolves into peaceful reconciliation. This incisive memoir is essential for better comprehending what the Vietnam experience was like for the large contingent of Americans who served there. It suggests the need for some fundamental rethinking about Vietnam not only for the war's veterans but also for those concerned with the lessons it carries for U.S. involvement in current insurgencies. *World History: Connections to Today*

Elisabeth Gaynor Ellis, Pearson/Prentice Hall, 2003-12 **American Capitalism** Nelson Lichtenstein, 2011-06-03 At the dawn of the twenty-first century, the legitimacy of American capitalism seems unchallenged. The link between open markets, economic growth, and democratic success has become common wisdom not only among policy makers but for many intellectuals as well. In this instance, however, the past has hardly been prologue to contemporary confidence in the free market. *American Capitalism* presents thirteen thought-provoking essays that explain how a variety of individuals, many prominent intellectuals but others partisans in the combative world of business and policy, engaged with anxieties about the seismic economic changes in postwar America and in the process reconfigured the early twentieth-century ideology that put critique of economic power and privilege at its center. The essays consider a broad spectrum of figures from C. L. R. James and John Kenneth Galbraith to Peter Drucker and Ayn Rand and topics ranging from theories of Cold War convergence to the rise

of the philanthropic Right They examine how the shift away from political economy at midcentury paved the way for the 1960s and the culture wars that followed Contributors interrogate what was lost and gained when intellectuals moved their focus from political economy to cultural criticism The volume thereby offers a blueprint for a dramatic reevaluation of how we should think about the trajectory of American intellectual history in twentieth century United States

Nationalism in Central Asia Nick Megoran,2017-10-04 Nick Megoran explores the process of building independent nation states in post Soviet Central Asia through the lens of the disputed border territory between Uzbekistan and Kyrgyzstan In his rich biography of the boundary he employs a combination of political cultural historical ethnographic and geographic frames to shed new light on nation building process in this volatile and geopolitically significant region Megoran draws on twenty years of extensive research in the borderlands via interviews observations participation and newspaper analysis He considers the problems of nationalist discourse versus local vernacular elite struggles versus borderland solidarities boundary delimitation versus everyday experience border control versus resistance and mass violence in 2010 all of which have exacerbated territorial anxieties Megoran also revisits theories of causation such as the loss of Soviet control poorly defined boundaries natural resource disputes and historic ethnic clashes to show that while these all contribute to heightened tensions political actors and their agendas have clearly driven territorial aspirations and are the overriding source of conflict As this compelling case study shows the boundaries of the The Ferghana Valley put in succinct focus larger global and moral questions of what defines a good border

Gordon, 1994-04-30 *Regulation and Economic Analysis A Critique Over Two Centuries* argues that long experience with the practice of regulation creates a broad anti intervention consensus among economists This consensus is based on comparison of real intervention to real markets rather than an ideological preconception It is shown that economic theory can support all possible positions on intervention Much theory is too abstract to support any policy position many arguments about how intervention might help contain qualifications expressing doubts about whether the potential can be realized many theories illustrate the drawbacks of intervention The vast literature on these issues concentrates either on specific cases or polemics that exaggerate both sides of the argument *Regulation and Economic Analysis* seeks to show the depth of the discontent develop interpretations of economic theory that follow from skepticism about statism and provide selected illustrations The discussion begins with examination of general equilibrium theory and proceeds to discuss market failure with stress on monopoly and particularly what is deemed excessive concern with predatory behavior International trade issues transaction costs property rights economic theories of government the role of special institutions such as contracts the defects of macroeconomic and equity arguments for regulating individual markets environmental economics and the defects of public land management policies are examined **World Studies: Medieval Times to Today** Heidi Hayes Jacobs, Michal L.
