Module 5.1 Cell division provides for reproduction, growth, and repair.

Answer the following as you read the module:

1. The cell theory is a fundamental concept of biology, which states that life is based on cells, and that cells arise from existing cells.

2. Which of the following is a function of cell division?
 - A) Growth/development of the organism
 - B) Production of egg and sperm
 - C) Replacement of lost or damaged cells
 - D) **All of the above are functions of cell division.**

3. You are a combination of genetic material from both of your parents. Which cells from your parents united during fertilization to form you? What are very important items in both of those cells from your parents?
