Civic Education Richard G. Niemi, Jane Junn, 2005-05-11

Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government. American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy. Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect. In this important book Richard G. Niemi and Jane Junn take a fresh look at what America's high school seniors know about government and politics and how they learn it. The authors argue convincingly that secondary school civics courses do indeed enhance students' civic knowledge. This book is based on the most extensive assessment to date of civic knowledge among American youth: the 1988 National Assessment of Education Progress (NAEP) Civics Assessment. The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching.

Civic Education & Culture Bradley C. S. Watson, 2005

What do we teach our citizens? This great Platonic question is as crucial today as it has ever been. America and the West come to terms with this question in the context of their richly diverse, technologically sophisticated, fundamentally individualistic societies. Virtually all would agree that such diversity, sophistication, and freedom are positive political and cultural goods, but many would also argue that they militate against the coherence that all regimes and civilizations must in some way demand. The nature, extent, and coherence of civic education are perhaps the greatest determinants of a regime's politics and culture, and the regime can in turn do much to foster the right kind of civic education. This book presents the insights of renowned scholars and writers including Stephen H. Balch, Timothy Fuller, and Roger Kimball, who have thought broadly and deeply about the role that education at all levels plays in promoting, maintaining, or undermining our politics, culture, and society.
