«Cooker jar' reserves» concept

The 'cooker jar reserves' was a strategic technique that was used by Enron's management to save what they had earned from a 'rainy day' using the means of storing extra earnings in reserves. The term 'reserves from the cookie jar may also refer to a firm's aggressive assumption of estimate depreciation of equipment and plants owned by the company. Again, allocation of loan losses, at the time of accounting, are subjects of cookie jar used especially when there are hard times in the market or economy.

The rate of some of the cookie jar strategic reserves, as per Enron's case study, might not necessarily be genuine since they lacked transparency. On many occasions, the management refused to avail the books of accounts to any deemed far stakeholders, not to mention the journalists. Instead, they argued for the increased share prices due to strategic management, for example, the utilization of the internet in their operation.

Lack of transparency came to light when the company became bankrupt and most notably when there was an overestimation of the financial statements. However, Enron seemed to have shifted the focus from this strategy and recognized premature earnings. Ultimately, this led to its increase in share capital and a sudden fall into bankruptcy in the year 2001. It is worthwhile to note that transparency in undertaking cookie jar strategies is ethical.
