  - What are each of the levels of organization? Recognize which levels are most or least inclusive?
    - **Cells, tissues, organs, organ systems, organisms, populations, communities, ecosystems, biosphere**
  - Describe the differences between a population, community, and ecosystem.
    - **Population:** group of interbreeding individuals of the same species in a given area
    - **Community:** consists of all populations of all species in a given area
    - **Ecosystem:** a community interacting with its environment through energy transfer
- **Describe the underlying characteristics that unite all living things**
  - What are the major principles of living things?
    - **all living things require ongoing inputs of energy and raw materials**
    - **all living things sense and respond to change (homeostasis)**
    - **all living things use DNA as the carrier of genetic information**
  - What is the difference between a producer and a consumer?
    - **Producer:** makes its own food using energy from sunlight or self
