Journal of Anthropological Research ,2015 *The Theater of Operations* Joseph Masco, 2014-12-01 How did the most powerful nation on earth come to embrace terror as the organizing principle of its security policy In The Theater of Operations Joseph Masco locates the origins of the present day U S counterterrorism

apparatus in the Cold War's balance of terror. He shows how after the attacks of 9/11 the U.S. global War on Terror mobilized a wide range of affective, conceptual, and institutional resources established during the Cold War to enable a new planetary theater of operations. Tracing how specific aspects of emotional management, existential danger, state secrecy, and threat awareness have evolved as core aspects of the American social contract, Masco draws on archival media and ethnographic resources to offer a new portrait of American national security culture. Undemocratic and unrelenting, this counterterrorism state prioritizes speculative practices over facts and ignores everyday forms of violence across climate, capital, and health in an unprecedented effort to anticipate and eliminate terror threats, real, imagined, and emergent. *Base Nation* David Vine, 2015-08-25 American military bases encircle the globe from Italy to the Indian Ocean, from Japan to Honduras. The far-reaching story of the perils of the U.S. military bases and what these bases say about America today. *Chemical Heroes* Andrew Bickford, 2020-11-16 In *Chemical Heroes*, Andrew Bickford analyzes the U.S. military's attempts to design performance enhancement technologies and create pharmacological supersoldiers capable of withstanding extreme trauma. Bickford traces the deep history of efforts to biologically fortify and extend the health and lethal power of soldiers from the Cold War era into the twenty-first century, from early adoptions of mandatory immunizations to bio-protective gear to the development and spread of new performance-enhancing drugs during the global War on Terrorism. In his examination of government efforts to alter soldiers' bodies through new technologies, Bickford invites us to contemplate what constitutes heroism when armor becomes built-in, wired-in, and even edited into the molecular being of an American soldier. Lurking in the background and dark recesses of all U.S. military enhancement research, Bickford demonstrates is the desire to preserve U.S. military and imperial power.
