populations together in new relationships articulated in moral discourses of custodianship food safety and sustainability Contributors to this volume came together in the attempt to stimulate collective insight into trends of rural change in Australia New Zealand and Europe The first two countries have been characterised by avowedly neoliberal rural policy with considerable departures from it in practice Europe on the other hand by a mix of policy measures which attempt to integrate land management and sustainability diversification and maintenance of a competitive farming sector within an overarching policy framework more overtly though only partially oriented towards sustaining rural society Aiming to build on research relating to the character of rural transitions this volume offers substantive and critical contributions to the understanding of the sources of unpredictability instability and continuity that underpin rural transition The papers explore changes and continuities in policy the governance of rural spaces technological developments relating to rural areas and populations and social forms of subjectivation and participation in increasingly diverse rural settings
