test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently Know the directions and format for each section of the exam Familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the AP exam to avoid nervousness and the mistakes caused by being nervous Work on the easier questions first If you find yourself working too long on one question make a mark next to it in your test booklet and continue After you have answered all of the questions that you can go back to the ones you have skipped Use the process of elimination when you are unsure of an answer If you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess If you cannot eliminate at least three of the answer choices you may choose not to guess as you will be penalized one guarter of a point for every incorrect answer Questions not answered will not be counted Be sure that you are marking your answer in the circle that corresponds to the number of the question in the test booklet Since the multiple choice section is graded by machine marking the wrong answer will throw off Evolution of Life Cecie Starr, Ralph Taggart, 1998 This selected paperback binding of the Eighth Edition of Biology The Unity and Diversity of Life gives instructors the option of purchasing a shorter text covering selected excerpted topics Six paperbacks are available Cell Biology and Genetics Evolution of Life Diversity of Life Plant Structure and Function Animal Structure and Function and Ecology and Behavior Evolution of Life covers Unit III Principles of Evolution and contains a customized table of contents and the back matter from Biology The Unity and Diversity of Life The Evolution of Life volume includes a brief history of evolutionary thought microevolutionary thought microevolutionary processes macroevolution the origin and macroevolution of life and a case study of human evolution Study Guide to Accompany Asking about Life [by] Tobin & Dusheck Lori K.
