 backyards cascading from window boxes even emerging from small cracks in city sidewalks given the slightest glint of
 sunlight Perhaps because they are everywhere it s easy to overlook the humble leaf but a close look at them provides one of
 the most enjoyable ways to connect with the natural world A lush incredibly informative tribute to the leaf Nature s Fabric
 offers an introduction to the science of leaves weaving biology and chemistry with the history of the deep connection we feel
 with all things growing and green Leaves come in a staggering variety of textures and shapes they can be smooth or rough
 their edges smooth lobed or with tiny teeth They have adapted to their environments in remarkable often stunningly beautiful
 ways from the leaves of carnivorous plants which have tiny trigger hairs that signal the trap to close to the impressive
 defense strategies some leaves have evolved to reduce their consumption Recent studies suggest for example that some
 plants can detect chewing vibrations and mobilize potent chemical defenses In many cases we ve learned from the

extraordinary adaptations of leaves such as the invention of new self cleaning surfaces inspired by the slippery coating found on leaves But we owe much more to leaves and Lee also calls our attention back to the fact that that our very lives and the lives of all on the planet depend on them Not only is foliage is the ultimate source of food for every living thing on land its capacity to cycle carbon dioxide and oxygen can be considered among evolution s most important achievements and one that is critical in mitigating global climate change Taking readers through major topics like these while not losing sight of the small wonders of nature we see every day if you d like to identify a favorite leaf Lee s glossary of leaf characteristics means you won t be left out on a limb Nature s Fabric is eminently readable and full of intriguing research sure to enhance your appreciation for these extraordinary green machines *The Nation* ,1892 *Normal Instructor and Teachers World* ,1928
