

'O' LEVEL BIOLOGY SUMMARY QNS \$ ANSWERS

1.

(a) What is meant by the term species?

(b) Distinguish between the artificial system of classification and the modern system classification.

(c) The whiptail lizards belong the genus *Chemidophorous* and species called *uniparens*, write down the scientific name of whiptail lizards. Give reasons.

(d) State the importance of the natural system of classification.

(e) Outline 10 characteristics of living things.

SOLUTION:

1. (a). Species refers to a group of closely related organisms, potentially capable of interbreeding to produce fertile offspring.

➤ Species is the basic unit of the natural system of classification.

➤ Members of a particular species are identical in structure, behavior and physiology. For instance, all human beings belong to the same species.

(b). Artificial system of classification, place organisms into groups based on their relationship to man.

➤ It uses a few easily observable features like size, how they move, their use to man, where they live e.g;

➤ Animals could be classified on whether they are domestic or wild, whether edible, or not, calm or ferocious.

➤ Plants could be classified as, medical, edible, etc.

➤ It is only useful to small local communities.

➤ On the other hand, the modern system of classification groups organisms based on many natural features, internal, external, physiological and historical evolutionary relationships between organisms.

➤ It places each organism in a series of groups in hierarchy.

➤ Each group is called a taxon and contains organisms sharing basic features.

➤ There are seven taxa including: kingdom, phylum (division, for plants), class, order, family, genus and species, in order of increasing shared characteristics and decreasing numbers in a given succeeding taxon.

➤ Kingdom is the largest taxon and the modern system of classification groups all living things into five kingdoms including monera, protocista, fungi, plantae and animalia.

➤ It is useful internationally.

(c) Scientific name of the whiptail lizard is *Chemidophorus uniparens*
