2020s A longstanding myth is that a person's tax burden will decline in retirement That hasn't been true for some time and in the 2020s retirees are likely to face a range of tax increases For a long time many retirees left a lot of money on the table by making less than optimum decisions about Social Security Medicare IRAs 401 k rollovers long term care and other key retirement issues For example a recent study done for United Income concluded that only four percent of Social Security beneficiaries made the optimum decision about when to claim retirement benefits For the most part the Boomers mistakes were bailed out by high stock market returns and low inflation Retirees in the 2020s aren't likely to be so fortunate Peak Boomers have to make the right decisions about all aspects of their retirement finances This book will cover each of the key retirement planning issues faced in the five years before retirement and the first five years of retirement and guide readers to making the right decisions for them
