(Be sure to know all underlined vocabulary and phrases!)

-Carbohydrates, Lipids, Proteins and Nucleic Acids are the 4 main macromolecules. See list of macromolecules below.

Macromolecules	Monomers	Functions	Examples
Carbohydrates 	Sugars 	Store Energy Structural Material	Potatoes 
Lipids 	Fatty acids 	Store Energy Form Membranes Insulate	Fat cells 
Proteins 	Amino acids 	Enzymes Structural Material Regulators	Hair 
Nucleic Acids 	Nucleotides 	Store genetic information	DNA 

-Carbohydrates, lipids, proteins, and nucleic acids are all organic. To be organic both Carbon (C) and Hydrogen (H) must be present.

-“Remember to drink Hot Chocolate” is a way of remembering the H and C that organic molecules must include.

-Carbohydrates are made of the elements CHO (CarbonHydrogenOxygen), Lipids are made of CHO (CarbonHydrogenOxygen), Proteins are made of CHON (CarbonHydrogenOxygenNitrogen), and Nucleic Acids are made of CHONP (CarbonHydrogenOxygenNitrogenPhosphorus). Notice all contain Carbon and Hydrogen.

-Water (H₂O) is inorganic (not organic) because it doesn't have both Hydrogen (H) and Carbon (C). **The test makers often ask if water is organic (it isn't). **

-All 4 macromolecules have monomers, which are known as building blocks. Building blocks are what each is made of.

-The building blocks of carbs are sugars, lipids are made of fatty acids and glycerol, proteins are made of amino acids, and nucleic acids are made of nucleotides. See list of building blocks below (monomers).

Conversational Science MCAT(R) Volume 1 Jim Brinegar,2015-07-05 The Conversational Science series is a new or at least different approach to preparing for the latest version of the Medical College Admissions Test This bit is only my personal opinion but I think the easiest way to do well on the MCAT is to understand the material There s one heck of a lot of material though so how should you study the things you ve already covered in class This study guide is written in an informal tone of voice because you and I are having a conversation and not a lecture This study guide contains a limited number of crudely drawn figures You re the person studying for the exam so I ask you to draw the rest of the figures for yourself A

figure that you draw yourself even if you have no artistic talent whatsoever teaches you much more than you can learn by simply looking at the beautiful full color professionally drawn figures in your textbooks This study guide has a limited number of review questions so you can check if you really did understand one chapter before you move on to the next This study guide DOES NOT contain any practice exams This is because in my opinion again based on my experience as a student and as an instructor the questions in the practice exams of many study guides are too often confusing poorly written and not at all like the actual questions on the actual exam And sometimes the answers given for some questions on some practice exams are just plain wrong This study guide may not be for everyone but I think there s a good chance it ll help you convince yourself that you really do understand the material

Medical College Admissions Test MCAT and MCAT2015 are registered trademarks of the Association of American Medical Colleges which neither sponsors nor endorses this product I took the MCAT way back in the middle of the 1980s and I did very well if I do say so myself Barron's how to Prepare for College Entrance Examinations Samuel C.
