Biodigest 10 The Human Body Answers:

ABC's of the Human Body, 1987 Discusses the major systems of the body in a question and answer format *The Human Body* Jay L. Wile, Marilyn Shannon, 2001-09 **10% Human** Alanna Collen, 2015-05-05 You are just 10% human For every one of the cells that make up the vessel that you call your body there are nine impostor cells hitching a ride You are not just flesh and blood muscle and bone brain and skin but also bacteria and fungi Over your lifetime you will carry the equivalent weight of five African elephants in microbes You are not an individual but a colony Until recently we had thought our microbes hardly mattered but science is revealing a different story one in which microbes run our bodies and becoming a healthy human is impossible without them In this riveting shocking and beautifully written book biologist Alanna Collen draws on the latest scientific research to show how our personal colony of microbes influences our weight our immune system our mental health and even our choice of partner She argues that so many of our modern diseases obesity autism mental illness digestive disorders allergies autoimmunity afflictions and even cancer have their root in our failure to cherish our most fundamental and enduring relationship that with our personal colony of microbes Many of the questions about modern diseases left unanswered by the Human Genome Project are illuminated by this new science And the good news is that unlike our human cells we can change our microbes for the better Collen's book is a revelatory and indispensable guide It is science writing at its most relevant life and your body will never seem the same again There's more to being human than you think Have you ever wondered why so many people are overweight Or why nearly half of youngsters have allergies Has it ever seemed strange that depression is so common Or that more and more children are being diagnosed with autism Using the latest scientific research Alanna Collen reveals the link between ill health and the body's community of microbes Many of the modern illnesses we accept as part of life are instead newly emerging conditions brought on by our failure to cherish the extension of our human cells our microbes In *10% Human* Collen explains how messing with your microbes can affect your metabolism your mind and your immune system why antibiotics C sections and infant formula can cause collateral damage and how diet can restore a beneficial community of microbes *10% Human* is an alarm call on behalf of our most faithful companions **Ultimate Questions & Answers: Human Body** Autumn Publishing, 2023-07-31 **The Human Body** Joan S. Gottlieb, 1996 **Answers about the Human Body** Frederick Smithline, 1969 Answers to sixty three questions about the human body provide a description of human anatomy the functions of the body's parts and systems and proper health care
