

Stare Lab _Relationships and Biodiversity

1. If scientists want to determine the similarity in the DNA fragments in several plant species, they should:
A) add salt water to cells from each plant
B) analyze electrophoresis results
C) compare seed structure of the plants
D) examine their chromosomes with a microscope
2. Base your answer on the following information and diagram and on your knowledge of biology: During the Relationships and Biodiversity lab, simulated pigment bands from three plant species were compared to those in *Bonania curupa*. The results were similar to those represented below.

Based on the results of this comparison alone, is there enough information to conclude which of the other three species is most closely related to *Bonania curupa*?

- A) Yes. Only species X has the same bands as *Bonania curupa*.
- B) Yes. Species Z has only two of the bands that *Bonania curupa* has.
- C) No. Additional tests should be done to test for other chemical similarities.
- D) No. Other unrelated plant species should be tested.

Biodiversity State Lab Analysis Questions:

Argument-driven Inquiry in Biology Victor Sampson, 2014-04-01 Are you interested in using argument driven inquiry for high school lab instruction but just aren't sure how to do it? You aren't alone. This book will provide you with both the information and instructional materials you need to start using this method right away. *Argument Driven Inquiry in Biology* is a one-stop source of expertise, advice, and investigations. The book is broken into two basic parts: 1. An introduction to the stages of argument-driven inquiry from question identification, data analysis, and argument development and evaluation to double-blind peer review and report revision. 2. A well-organized series of 27 field-tested labs that cover molecules and organisms, ecosystems, heredity, and biological evolution. The investigations are designed to be more authentic scientific experiences than traditional laboratory activities. They give your students an opportunity to design their own methods, develop models, collect and analyze data, generate arguments, and critique claims and evidence. Because the authors are veteran teachers, they designed *Argument Driven Inquiry in Biology* to be easy to use and aligned with today's standards. The labs include reproducible student pages and teacher notes. The investigations will help your students learn the core ideas, crosscutting concepts, and scientific practices found in the Next Generation Science Standards. In addition, they offer ways for students to develop the disciplinary skills outlined in the Common Core State Standards. Many of today's teachers like you want to find new ways to engage students in scientific practices and help students learn more from lab activities. *Argument Driven Inquiry in Biology* does all of this even as it gives students the chance to practice reading, writing, speaking, and using math in the context of science.
