From Where We Came Chris Young Kelly, 2021-04-18 Did you know that a significant percentage of us are part Neanderthal in our genetic makeup So were they as smart as we are Why and how are we different Could we talk to them Or more interestingly did we What do these questions have to do with from where we came A comprehensive overview of how we came to be If you're searching for answers and tired of information overload from the media you are not alone Fortunately despite all the noise evolution boils down to a few physics and math principles A significant part of the basic process by which we evolved from molecules can be summed up with math similar to the process of boarding a city bus Through pop culture references personal experiences humor graphics and common sense let's explore this topic through one physicist's eyes wrapped in plain English We will dive through evolution at the molecular and human levels connected by cause and effect Follow along as we explore how humans have survived and even prospered against all odds through millions of years It should become apparent that we are all alike in every way except for minute differences in our genes We cannot help but be motivated to find ways to better ourselves as a species We are all blood brothers and sisters all 7.8 billion of us after all

Tague, 2014-01-01 Making Mind Moral Sense and Consciousness in Philosophy Science and Literature posits the genesis of narrative as an adaptive function stemming from consciousness and moral sense The book is unique with its idea of the individual character evolving narrative in relation to the group Central to the argument is the claim that prehistorically consciousness and moral sense intersected to form narrative More than addressing the origin of story the book examines and explains the evolution of narrative The book is an interesting study of how our species inherited moral sense can differ dramatically from one individual to another While mores pertain to a group narrative comes from and is processed by the individual and reaches its high point in the novel We see how the moral sense works in characters as a monitor and we feel it operating in us as readers in terms of approval or not      *american ojournal of physical anthropology* ., 1957      **Research Centers Directory** , 2007
