 conserving Maryland s amphibians and reptiles Naturalists herpetologists and ecologists alike agree that tracking
 herpetofauna is a challenging undertaking Scientists are concerned about the decline of once familiar species but evidence
 has often been too anecdotal to support firm conclusions To better understand the distribution of amphibians and reptiles in
 Maryland and forecast species futures in a time of accelerated environmental threats conducting a comprehensive statewide
 survey updating 1970s era distribution maps seemed ideal However this endeavor was of an impossibly ambitious scope for
 scientists alone to tackle Enter the Maryland Amphibian and Reptile Atlas project comprising nearly a thousand dedicated
 citizen scientists who discovered and recorded the locations of herpetofauna throughout every corner of Maryland In The
 Maryland Amphibian and Reptile Atlas Heather R Cunningham and Nathan H Nazdrowicz present the findings of this
 massive undertaking This definitive guide combines nearly 160 comprehensive new herpetological maps with historical
 distribution maps and in depth species accounts Color photos illustrate the natural history of the 89 species of frogs
