

18.1 Finding Order in Diversity

Learning Objectives

- LO1** Describe the goals of taxonomic classification and nomenclature.
- LO2** Identify the levels of the classification system derived by Linnaeus.

Learning Outcomes

Assigning Scientific Names By using Linnaeus's system of nomenclature, biologists assign the most appropriate names. Biologists also use nomenclature to group organisms based on their relationships. Biologists use a hierarchical system. The concept of naming and grouping organisms is called **taxonomy**.

For example, Linnaeus classified *Linnaea borealis* as a running stream, called **taxonomic nomenclature**. In botanical nomenclature, each species is assigned a two-part scientific name.

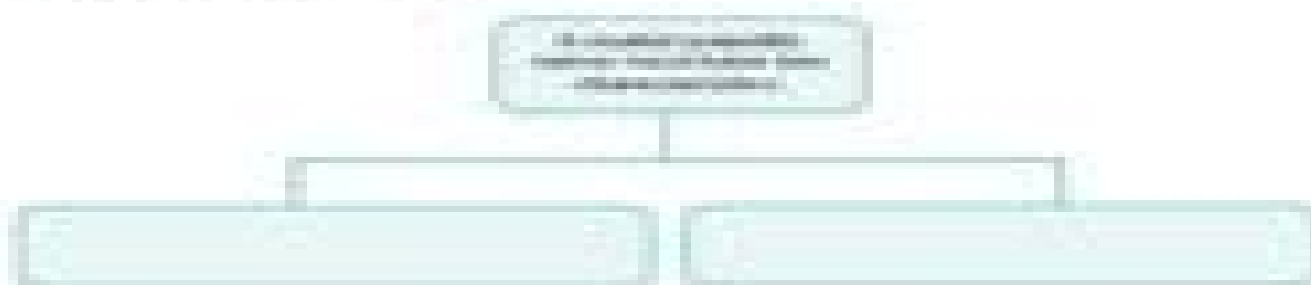

- 1) The first part of the name refers to the genus, or a group of similar species.
- 2) The second part of the name is unique to each species.

Assigning Scientific Names System Linnaeus's system of classification has seven different levels. Biologists use Linnaeus's hierarchy to identify and group species. Family, order, class, phylum, and kingdom. Each of the ranking levels is called a **taxon**.

- 1) Genus is a group of similar species, a family is a group of similar genera.
- 2) An order is a group of similar families.
- 3) A class is a group of similar orders.
- 4) A phylum is a group of similar classes.
- 5) A kingdom is a group of similar phyla.

Assigning Scientific Names

- 1) Complete the graphic organizer.

Computational Finance Shu-Heng Chen, 2012-12-06 After a decade of development genetic algorithms and genetic programming have become a widely accepted toolkit for computational finance Genetic Algorithms and Genetic Programming in Computational Finance is a pioneering volume devoted entirely to a systematic and comprehensive review of this subject Chapters cover various areas of computational finance including financial forecasting trading strategies development cash flow management option pricing portfolio management volatility modeling arbitrage and agent based simulations of artificial stock markets Two tutorial chapters are also included to help readers quickly grasp the essence of these tools Finally a menu driven software program Simple GP accompanies the volume which will enable readers without a strong programming background to gain hands on experience in dealing with much of the technical material introduced in this work

Nature-Inspired Algorithms for Optimisation Raymond Chiong, 2009-04-28 Nature Inspired Algorithms have been gaining much popularity in recent years due to the fact that many real world optimisation problems have become increasingly large complex and dynamic The size and complexity of the problems nowadays require the development of methods and solutions whose efficiency is measured by their ability to find acceptable results within a reasonable amount of time rather than an ability to guarantee the optimal solution This volume Nature Inspired Algorithms for Optimisation is a collection of the latest state of the art algorithms and important studies for tackling various kinds of optimisation problems It comprises 18 chapters including two introductory chapters which address the fundamental issues that have made optimisation problems difficult to solve and explain the rationale for seeking inspiration from nature The contributions stand out through their novelty and clarity of the algorithmic descriptions and analyses and lead the way to interesting and varied new applications

Diversity in Global Mental Health Sabine Bährer-Köhler, Blanca Bolea-Alamanac, 2019-10-23 Mental illness occurs in all communities regardless of social status gender race or culture Despite this research in mental health historically has been biased towards Western centric heterosexual male models of disease Many models of service have excluded sexual and ethnic minorities and may not have been inclusive of different cultures or spiritual approaches All of these factors may in turn isolate these communities and thus lead to an increased vulnerability to disease This brief explores the diversity of cultural ethnic social and gender perspectives on how to achieve better mental health care for societies across the globe The authors emphasize diversity focusing on lifespan aspects while weaving in social racial ethnic cultural and gender perspectives They further expand their analysis by zeroing in on prominent determinants in global mental health care including globalization international migration specific population idiosyncrasies climate change and political context Finally it includes novel

neurobiological and biomedical approaches to treatment and a suggestions of how those can be implemented from the perspective of diversity and gender inclusiveness Diversity in Global Mental Health will be of great interest to experts and researchers in behavioral medicine as well as practitioners and educators working in global mental health promotion and prevention of mental illness and related fields such as psychology social policy and public health The Routledge International Handbook of Creative Cognition Linden J.
