

7 Practices That Will Ensure A Comfortable Retirement

1 Choose a retirement plan carefully

When choosing between an IRA, self-directed IRA and a 401k plan, choose the one that aligns with your retirement goals.

- IRA: up to \$6,500 in 2016
- 401k: up to \$24,000 in 2016
- Solo 401k: up to \$60,000 in 2016

2 Always get the 401k match

Fund your 401k at least to the point where you bag the maximum matching dollars. Every employer uses a different method but a 6% matching contribution is standard.

3 Don't go with the default savings rate

When joining a job, increase your 401k savings rate from the default 3%. Choose a rate that helps you save enough to pay bills in your retirement. Start with a target to save 10% and adjust as you age.

4 Never miss catch-up contributions

The IRS allows you to save more for retirement as you age. Put catch-up contributions above other expenses.

Traditional IRA: \$1,000 in 2016
401k plan: \$6,000 in 2016

5 Increase contributions as you age

It's okay to save smaller portion of your paychecks during your initial years but as you age, start raising your contributions.

Use bonuses and raises to reach maximum contributions. You may even choose automatic escalation feature.

6 Add diversification with Roth 401k

Contribute to a Roth 401k along with your regular IRA plan. A Roth 401k accepts after-tax dollars, allowing you to withdraw money tax-free during retirement.

Investment returns are withdrawn tax-free, provided you satisfy IRS regulations.

7 Be aware of IRS penalties

Find out more about early withdrawal or late withdrawal penalties. Make sure to take required minimum distributions as per regulations.

- Traditional IRA: 59 1/2 years
- 401k plan: 55 years

8 Gain investment freedom with self-directed retirement

Invest in alternative assets using self-directed retirement plan. Investment options include:

- Real estate
- Mortgage notes
- Tax liens & tax deeds
- Private equity/ private lending

we'll explore how our emotions, beliefs, and behaviors influence our financial decisions. We'll see how this understanding can transform our relationship with money and help us achieve our goals. Financial psychology studies the relationship between the human mind and money. It explores how psychological factors such as emotions, perceptions, and beliefs influence our financial decisions. It combines concepts from psychology and economics to understand financial behavior. Financial psychology isn't just about numbers and graphs. It helps us understand why we sometimes make financial decisions that don't make rational sense. By understanding the psychological mechanisms behind our decisions, we can make more informed decisions that align with our goals. Emotions such as fear, greed, and anxiety significantly influence our financial decisions. Fear of losing money can lead to conservative decisions, while greed can lead to excessive risk-taking. Hope for a better future can motivate us to save, but it can also lead us to invest in high-risk assets. Emotions are like an internal GPS that guides us in our financial decisions. However, they can lead us down a wrong path if not managed properly. By identifying and understanding our emotions, we can make more rational decisions that are aligned with our long-term goals. Cognitive biases are mental shortcuts we use to make decisions faster, but they can lead us to make mistakes. Examples of biases include loss aversion, confirmation bias, and herd behavior. How to identify and overcome these biases to make sounder financial decisions. Our brains are incredible machines, but they are also prone to making mistakes. Cognitive biases are like optical illusions that distort our perception of reality. By being aware of these biases, we can take steps to counteract their effects and make more rational decisions. Our financial habits are shaped by our experiences and beliefs. The importance of developing healthy financial habits such as saving, investing, and planning for the future. How to create new habits and break old financial habits. Our financial habits are like paths we follow on autopilot. If we want to change our financial results, we need to change our paths. By developing new, positive financial habits, we can transform our financial lives. Financial psychology offers us a new perspective on money. Instead of seeing money as an end in itself, we can see it as a means to achieve our goals and live a more fulfilling life.

Today's Guide to Retirement Planning David Hays, Doug Hughes, 2015-02-18. The word retirement for today's retirees and soon-to-be retirees means exactly the opposite of what it meant for our parents and grandparents. It now means beginning rather than stopping. What will your next beginning be? Today's Guide to Retirement Planning, a resource for adults ages fifty and over, helps you figure it out. This is a book that actually forces you to prioritize by taking you through a personal and financial inventory to create a plan that you will follow because it's your plan. The section on the big ten major financial planning roadblocks is by itself worth the price of admission and invaluable for everyone. This book will guide you with practical advice not only on tax, investment, and estate planning but also in coordinating that with your own personal wish list for your next beginning. Ed Slott, CPA, founder of www.irahelp.com. Baby boomers are reinventing retirement. In Today's Guide to Retirement Planning, financial advisers David Hays and Doug Hughes offer important guidelines for adults on the cusp of this uncharted territory. Throughout our working lives, we tend to focus on how much money we need to save.
