Uncommonly Good Ideas Sandra Murphy, Mary Ann Smith, 2015-04-03 This innovative resource provides teachers with a road map for designing a comprehensive writing curriculum that meets Common Core State Standards. The authors zero in on several big ideas that lead to and support effective practices in writing instruction such as integrating reading, writing, speaking, and listening; teaching writing as a process; extending the range of the students' writing; spiraling and scaffolding a writing curriculum; and collaborating. These ideas are the cornerstone of best research-based practices as well as the CCSS for writing. The first chapter offers a complete lesson designed around teaching narrative writing and illustrates tried and true practices for teaching writing as a process. The remaining chapters explore a broad range of teaching approaches that help students tackle different kinds of narrative, informational, and argumentative writing as well as complexities like audience and purpose. Each chapter focuses on at least one of the uncommonly good ideas and illustrates how to create curricula around it. *Uncommonly Good Ideas* includes model lessons and assignments, mentor texts, teaching strategies, student writing, and practical guidance for moving the ideas from the page into the classroom. *Adult and Continuing Education: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources, 2014-03-31 Beyond the undergraduate and graduate levels, education has traditionally ceased when students enter the workforce as professionals in their respective fields. However, recent trends in education have found that adult students beyond the traditional university age often benefit greatly from returning to further their education. *Adult and Continuing Education: Concepts, Methodologies, Tools, and Applications* investigates some of the most promising trends in furthering education and professional development in a variety of settings and industries. With an extensive array of chapters on topics ranging from non-traditional students to online and distance education for adult learners, this multi-volume reference book will provide students, educators, and industry professionals with the tools necessary to make the most of their return to the classroom. *Proficiency and Beliefs in Learning and Teaching Mathematics* Yeping Li, Judit N. Moschkovich, 2013-09-04 Efforts to improve mathematics education have led educators and researchers to not only study the nature of proficiency beliefs and practices in mathematics learning and teaching but also identify and assess possible influences on students and teachers' proficiencies, beliefs, and practices in learning and teaching mathematics. The complexity of these topics has fascinated researchers from various backgrounds, including psychologists, cognitive or learning scientists, mathematicians, and mathematics educators. Among those researchers, two scholars with a similar background, Alan Schoenfeld in the United States and Gnter T rner in Germany, are internationally recognized for their contributions to these topics. To celebrate their 65th birthdays in 2012, this book brought together many scholars to reflect on how their own work has built upon and continued Alan and Gnter's work in mathematics education. The book contains 17 chapters by 33 scholars from six different education systems. This collection describes recent research and provides new insights into these topics of interest to mathematics educators, researchers, and
