Community Based Disaster Management Manual:

Handbook of Disaster Research Havidán Rodríguez, William Donner, Joseph E. Trainor, 2017-11-16 This timely Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research. It provides an interdisciplinary approach to disasters with theoretical, methodological, and practical applications. Attention is given to conceptual issues dealing with the concept of disaster and to methodological issues relating to research on disasters. These include Geographic Information Systems as a useful research tool and its implications for future research. This seminal work is the first interdisciplinary collection of disaster research as it stands now while outlining how the field will continue to grow.

CBDRM 1 Community Based Disaster Management Dr. Antony Gnanamuthu, 2025-11-01 Dr. Antony Gnanamuthu, who has worked with the target communities vulnerable to cyclone first responders and been a practitioner in the field of disaster management. He has worked diligently in Asia, Africa, and Europe at international levels in this field. He has developed this book on the basis of his experiences in disaster-prone Indian State of Odisha as well as his experience while working with various countries in the three continents Asia, Africa, and Europe. His own research in implementing Community Based Disaster Risk Management on community aspects of disaster management as well as use of policy initiatives and technology developments has been the basis on which he has further developed the basic themes of this book training manuals from a community preparedness perspective as a bottom-up approach. As Program Director, he brought this work with a large number of new ideas and initiatives which were innovative in nature and were put to practice during the period 2005-2009 while implementing the Odisha Disaster Mitigation Program (ODMP) funded by the Federal Republic of Germany through KfW with Government of India through Odisha State Government. Indian Red Cross Odisha State branch is even now being practiced by the Odisha Disaster Management Authority in all the shelter communities across Coastal Odisha. This initiative has reduced the loss of life to almost nil through proper planning and coordination with various relevant stakeholders in a bottom-up approach as in Village Disaster Management Plan (VDMP) connecting the target population with the Government officials at Panchayat, Block, Thasil, and District level. This community-based initiative is now being practiced in various developing countries by mobilizing the target communities as first responders in case we are to achieve the benchmarks set and accepted globally relating to the Sendai Framework and other global mandates. The key take away is that this model of mobilizing the target communities as first responders, given the nature of the hazards and risks, natural and human-made, with which we are facing now and in the future. There are plenty of ideas put forward by Dr. Antony Gnanamuthu which can be the basis for further policy and strategy development and actions. This book training manuals, right thinking people and concerned strategies and practitioners find new vistas of public action in India and in the disaster-prone areas around the world. This community mobilization can be practiced and has significance for any country around the world having disaster-prone areas. The recommendations are equally relevant for any other country as well and as such the ideas also have an

Handbook of Civil Society and Social Movements in Small States Lino Briguglio,Michael Briguglio,Sheila Bunwaree,Claire Slatter,2023-02-22 This volume is unique because of its focus on small states There are many studies on civil society and social movements but none that specifically deal with this category of countries As is well

known small states have particular characteristics including a limited ability to reap the benefits of economies of scale a high degree of exposure to forces outside their control and the proximity of politicians to the voters often leading to clientelistic relationships and patronage networks The small island developing states have the additional problem of high environmental vulnerability with some also dealing with disproportionate ecological footprints These factors have a bearing on the organization and performance of civil society organizations and social movements as explained in several chapters of this book The volume is organized in three parts dealing with aspects of civil society and social moments in small states in the political social and environmental spheres respectively Various definitions of civil society are proposed in the chapters but most authors associate the term with organized groups operating in the interest of citizens independently of government and commercial business including various forms of non governmental organizations NGOs Civil society also encompasses social movements which are considered to be loosely organized collective campaigns in pursuit of social goals These two terms are sometimes used interchangeably however some authors argue that social movements tend to engage in contentious politics including protests while NGOs engage through more organized and institutional routes
