Frugal Innovation Adela J. McMurray, Gerrit A. de Waal, 2019-11-28 Customers are increasingly seeking low cost high quality or what is known as frugal products that meet the buyer's needs while reducing the associated cost of ownership. This book examines the developing principles and theories of frugal innovations across the globe. The authors identify frugal innovation FI using a multi method approach to data analysis. They argue that the concept of frugality as a societal ethical value has undergone several changes and propose a differentiated model of frugal innovations. They address frugal innovations that have never been accessible to the public. Hands on case studies across various industry sectors and countries supported by theory provide multiple learning opportunities. The authors explore the relationship between FI and digitalisation and technology and discuss how FI can be applied in the context of contemporary issues such as food security. Further they articulate the mechanisms by which FI beliefs and values can be incorporated into organisational culture. The final chapters address both ethical and controversial views of frugal innovation. The book is a valuable resource for students in business courses for industry professionals wanting to improve their triple bottom line and for educators wanting to influence and change the mindsets of the younger generations to effectively deal with today's and tomorrow's challenges.

Gender, Power and Knowledge for Development Lata Narayanaswamy, 2016-12-08 Knowledge for development is under theorised and under researched within development studies but as a set of policy objectives it is thriving within development practice. Donors and other agencies are striving to improve the flow of information within and between decision makers and so called poor and marginalized groups in order to promote economic and social development including the empowerment of women. Gender Power and Knowledge for Development questions the assumptions and practice of the knowledge for development industry. Using a qualitative multi site ethnographical study of a Northern based gender information service and its beneficiaries in India the book queries the utility of the knowledge paradigm itself and the underlying assumption that a knowledge deficit exists in the Global South. It questions the value of practices designed to address this presumed deficit that seek to increase information without addressing the specific problems of the knowledge systems being targeted for support. After reviewing the evidence the book recommends that international organisations governments and practitioners move away from the belief that information intermediaries can employ progressive correctives to tinker at the edges and thus resolve the shortcomings of on going attempts to use knowledge alone as a driver of development. Gender Power and Knowledge for Development will be of great interest to researchers students in development studies gender studies and communication studies as well as INGOs donor agencies and groups engaged in information for development i4D ICT for development ICT4D Tech4Dev knowledge mobilization and knowledge for development K4D. **Multivariate Statistical Methods in Quality Management** Kai Yang, Jayant Trewn, 2004-03-17 Multivariate statistical methods are an essential component of quality engineering data analysis.
