1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .

- a. The net force on the crate is (zero) (greater than zero).
b. Evidence for this is no acceleration.

2. A slight pull P is exerted on the crate, not enough to move it.

- a. The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
b. The net force on the crate is (zero) (greater than zero).

3. Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction f is (less than) (equal to) (greater than) P .
b. Constant velocity means acceleration is (zero) (greater than zero).
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull P is further increased and is now greater than friction f .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
6. If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N? 1 m/s² 500 N? 5 m/s²

Higher Education Computer Science Jenny Carter, Michael O'Grady, Clive Rosen, 2023-05-29 The march towards online and blended teaching present before the Covid 19 pandemic has been accelerated by it, and there is no going back. Students and staff may object, but the economic drive towards greater productivity will inevitably result in less face-to-face instruction. Therefore, it is incumbent on those delivering this precious in-person resource to make maximum use of time, which raises the question: how? The second edition

of Higher Education Computer Science offers some potential answers It also addresses other questions such as why have f2f teaching at all what is the purpose of f2f and what is the appropriate balance between the two The first edition began to offer suggestions for optimising limited opportunities to get together with students Aligned with that this unique new volume examines how to use the technology available to maximum advantage For example resources such as Moocs and other on line instructional materials can provide invaluable pedagogic support In addition the book addresses problem based learning using robotics in the teaching of programming and a multidisciplinary approach to data science Although it includes a chapter on distance learning there is greater emphasis placed on the soft transferable skills and employability skills that are best delivered in person Further the work provides several examples of putting theory into practice when teaching computer science at both undergraduate and postgraduate levels Written by experienced practitioners each chapter tackles a particular teaching activity or topic within computing presented in such a way that other practitioners can use As such this new volume will be an invaluable resource to those who want to protect and optimise in person teaching
