- 1 The notion of national output is at the heart of macroeconomics The total amount of output produced by a country constitutes its ultimate budget constraint A country can only use more output than it produces if it borrows the difference from foreigners
- 2 The most widely used measure of national output is gross domestic product which is the value of all the goods and services produced in an economy To avoid counting the same output more than once it is best to focus on the value added at each stage of production
- 3 The expenditure method is the standard approach to calculating GDP It is the market value of all final goods and services produced within a country over a given year Government officials typically divide expenditure on final goods and services into five categories consumption by households investment in productive assets government spending on goods and services exports and imports
- 4 GDP is the total output of a country and it is measured by focusing on national income National income is the amount paid to factors of production labor and capital for their services

**Management Education in India** Manish Thakur, R. Rajesh Babu, 2016-08-08 This volume problematizes different facets of management education in India: pedagogy, curricula, and disciplinary and institutional practices from the perspective of the Global South. The essays in this volume bring out the institutional

challenges of crafting a relevant academic programme that converses with both national specificities and global realities. Coming from diverse academic specializations the contributors traverse the interface of their respective disciplines with management education. In doing so they engage with the ongoing global debate on management education. This volume fills a noticeable gap of serious scholarly reflection on the state of management education. While there have been sporadic reflections and occasional critiques a critical stocktaking of the institutional and disciplinary aspects of management education has been long wanting. This volume is of interest to scholars and practitioners of management education across the globe and is likely to generate debate on its contemporary relevance and future trajectory.
