## **Concrete Manual Gambhir:**

*Concrete Manual* M. L. Gambhir, 1992      **Computer Aided Concrete Mix Design** Rajendra Chalisgaonkar, 2003

**Concrete Construction** Akhtar Surahyo, 2019-03-05 This book is a thorough and comprehensive update of the 2002 edition that incorporates detailed references to the Canadian American and British European standards contextualized by the author based on over 30 years of construction experience In addition to updates to the core text many new topics are presented in the second edition including a chapter discussing the methods for achieving quality control and ensuring quality assurance in concrete construction The book consists of two parts The first part provides basic information about normal concrete its grades used on sites and various kinds of modified concretes such as fiber reinforced concrete sulphur concrete roller compacted concrete high performance concrete ultra high performance concrete and flowing concrete It further addresses physical properties of concrete and various types of Portland cement blended cements admixtures additives including properties of aggregates and their influence The second part of the book highlights the principal causes of concrete deterioration along with protective measures resulting from incorrect selection of constituent materials poor construction methods external factors chemical attack corrosion problems hot and cold weather effects and the various errors in designing and detailing Featuring an extensive bibliography of the highly adopted standards as well as manuals and journals critical to the construction industry at the end of each chapter the volume offers readers an advanced understanding of the theory and practical application of concrete technology and international standards in North America and Britain Addresses concrete technology as well as concrete construction practices meeting national and international standards Maximizes readers understanding of the principal causes of concrete deterioration along with protective measures Facilitates readers grasp of different nomenclature used for the same materials in different parts of the world Features suitable tables charts and diagrams that illustrate and organize useful information Explains sustainable concrete doctrine and how to achieve it meeting green concrete building requirements Provides a glossary conversion factors and examples of concrete mix design

*Advances in Structural Engineering* Vasant Matsagar, 2014-12-12 The book presents research papers presented by academicians researchers and practicing structural engineers from India and abroad in the recently held Structural Engineering Convention SEC 2014 at Indian Institute of Technology Delhi during 22-24 December 2014 The book is divided into three volumes and encompasses multidisciplinary areas within structural engineering such as earthquake engineering and structural dynamics structural mechanics finite element methods structural vibration control advanced cementitious and composite materials bridge engineering and soil structure interaction *Advances in Structural Engineering* is a useful reference material for structural engineering fraternity including undergraduate and postgraduate students academicians researchers and practicing engineers      *Sustainable Education and Development—Green Buildings* Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel

Bamfo-Agyei, 2024-11-22 This book is Volume 2 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of green buildings Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub-Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID-19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019.19 Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020 The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers The conference focusses on applied research discussions and its dissemination Researchers from research institutions academicians postgraduate students

politicians and industry representatives will be the primary audience for the conference proceedings

**The Indian Concrete Journal** ,1993      **International Books in Print** ,1997      **Practical Civil Engineering** P.K. Jayasree,K Balan,V Rani,2021-05-03 The book provides primary information about civil engineering to both a civil and non civil engineering audience in areas such as construction management estate management and building Basic civil engineering topics like surveying building materials construction technology and management concrete technology steel structures soil mechanics and foundations water resources transportation and environment engineering are explained in detail Codal provisions of US UK and India are included to cater to a global audience Insights into techniques like modern surveying equipment and technologies sustainable construction materials and modern construction materials are also included Key features Provides a concise presentation of theory and practice for all technical in civil engineering Contains detailed theory with lucid illustrations Focuses on the management aspects of a civil engineer s job Addresses contemporary issues such as permitting globalization sustainability and emerging technologies Includes codal provisions of US UK and India The book is aimed at professionals and senior undergraduate students in civil engineering non specialist civil engineering audience

**High Performance Structures and Materials VI** Willy Patrick Wilde,C. A. Brebbia,Santiago Hernández,2012 Containing the edited papers presented at the Sixth International Conference on High Performance Structures and Materials High Performance Structures and Materials VI addresses the issues involved with advanced types of structures particularly those based on new concepts or new materials Contributions will highlight the latest developments in design optimisation manufacturing and experimentation in these areas The use of novel materials and new structural concepts nowadays is not restricted to highly technical areas like aerospace aeronautical applications or the automotive industry but affects all engineering fields including those such as civil engineering and architecture Most high performance structures require the development of a generation of new materials which can more easily resist a range of external stimuli or react in a non conventional manner The book will cover such topics as Composite materials and structures Lightweight structures Nanocomposites High performance concretes Concrete fibres Automotive composites Steel structures Natural fibre composites Timber structures Material characterisation Experiments and numerical analysis Damage and fracture mechanics Computational intelligence Adaptable and mobile structures Environmentally friendly structures

**Advanced Materials and Sustainability in Civil Engineering** Kiran Kumar Poloju,2021-10-25 This book discusses the detailed concepts of concrete and its development with pros and cons Besides the significance of various industrial wastes as partial replacements with concrete ingredients such as cement and aggregates are discussed The creation of cement contributes to around 7% of carbon emissions into the atmosphere leading to greenhouse effect and global warming Similarly the wastes generated from various industries such as thermal steel ceramic marble paper and etc shows the impact on atmosphere and leads to air pollution and land pollution Thus it is essential to focus on these wastes to use them in a profitable manner without compromising the current needs This

book discusses a few examples on studies of using various industry wastes as partial replacement of cement in concrete

**Water and Energy International** ,2015      **Latest Developments in Civil Engineering** Krishna Kant Pathak,J. M. S. J. Bandara,Ramakant Agrawal,2023-10-02 This book comprises select proceedings of the International Conference on Recent Advances in Civil Engineering RACE 2022 The contents of this book focus on the recent advancements and innovations in the field of civil engineering and various related areas such as design and development of new sustainable and smart building materials performance analysis and simulation of steel structures design and performance optimization of concrete structures structural engineering geotechnical engineering water resources engineering and hydraulics transportation and bridge engineering building services design surveying and remote sensing engineering management and renewable energy This book serves as a useful reference to researchers and professionals in the field of civil engineering      **ACI Materials Journal** ,1993      *Walford's Guide to Reference Material: Science and technology* Albert John Walford,1993 Cette
