*Nursing Theorists and Their Work - E-Book* Martha Raile Alligood, Ann Marriner Tomey, 2013-09-30 The most comprehensive of its kind this classic resource in the field of nursing theory provides an in depth look at 49 theorists of historical international and significant importance Each chapter features a clear consistent presentation of a key nursing philosophy or theory Case studies and critical thinking activities help bridge the gap between theory and application A case study at the end of each theorist chapter puts the theory into a larger perspective helping you understand how the information can be applied to practice A Major Concepts Definitions box in each theorist chapter outlines and summarizes the theory s most significant ideas and clarifies content specific vocabulary Each theorist chapter concludes with an extensive bibliography outlining numerous primary and secondary sources of information ideal for research projects Critical Thinking Activities at the end of each theorist chapter challenge you to process the theory presented and apply it to personal and hypothetical practice situations Introductory chapters provide you with a strong foundation in the history and philosophy of science logical reasoning and the theory development process Diagrams for theories help you visualize and better understand inherently abstract concepts Each theorist chapter is written by a scholar specializing in that particular theorist s work often an individual who has worked closely with the theorist Most chapters have been reviewed and edited by the theorist for currency and accuracy further validating the accounts set forth in the text Theorist birth and if applicable death dates help you place each individual into a time context A new chapter introduces the theorist Afaf Meleis and covers her Transition Theory that has helped shape the theoretical development of nursing Points for further study at the end of each chapter direct you to assets available for additional information Need to know information is highlighted in at a glance summary boxes throughout to help you quickly review key concepts Personal quotes from the theorists help you gain insight and make each complex theory more memorable Updated references include only published works to ensure accuracy and credibility

**Theoretical Nursing** Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher

**Entrepreneurial Ecosystems in Cities and Regions** Robert Huggins, Fumi Kitagawa, Daniel

Prokop,Christina Theodoraki,Piers Thompson,2024-02-18 The concept of entrepreneurial ecosystems has emerged as a means for theorizing and making policy decisions concerning entrepreneurship and economic development within and across cities and regions Entrepreneurial Ecosystems in Cities and Regions assembles original contributions from scholars across the world to provide an in depth analysis of a concept that has the capability to capture a dynamic global economy with entrepreneurial innovation at the crux of its future development It addresses wider issues concerning the evolution of new forms of industrial organisation The book develops an agenda and understanding that aims to build upon the early explosion of interest within academic policy and practice circles by providing new and important insights that contribute to knowledge direct future investigations and to increase the effectiveness of research based policy and practice Entrepreneurial Ecosystems in Cities and Regions builds a framework for establishing a robust and sustainable concept that can help propel an understanding of how cities and regions around the world can use entrepreneurship and innovation as a catalyst for their future economic social and environmental development The volume highlights the need to account for urban and regional contextual factors when determining the strength or otherwise of entrepreneurial ecosystems and illustrates that these factors can lead to the development of entrepreneurial activity of quite a different nature across cities and regions
