This general chemistry text centres on the theme that observable change in chemical systems is the result of molecular change. The aims of this edition are to enable students to perceive matter and change at the molecular level and to help build student confidence in their ability to solve chemical problems as they discover the relevance of chemistry to their lives.

Analytical Chemistry Gary D. Christian, 1986-01-17 This is a practical approach to quantitative analytical chemistry covering all areas of modern quantitative analysis taught in a standard first course in quantitative analysis. Includes experiments in each method. This edition includes coverage of electronic balance and propagation of error. Equilibria are introduced in terms of Gibbs free energy buffers and calculations are presented in terms of proton acceptor/donor. Experiments are now all at the back of the book. SI units are emphasized throughout. Numerous applications to the life sciences.

Introductory Chemistry Steve Russo, Mike Silver, 2002 Steve Russo and Mike Silver turn chemistry into a memorable story that engages readers and provides the context they need to understand and remember core concepts. The book builds interesting applications and well designed illustrations into the narrative to get and hold attention then builds confidence with integrated active learning activities. Readers make the connections between concepts and the problem solving techniques they need to master as they read. The new edition strengthens this conceptual approach and presents additional quantitative techniques in key areas. Readers will find enhanced support for quantitative problem solving and more challenging questions at the end of each chapter in addition to the wealth of technology based support on The Chemistry Place™ Special Edition and on The Chemistry of Life CD ROM. For college instructors and students.
