

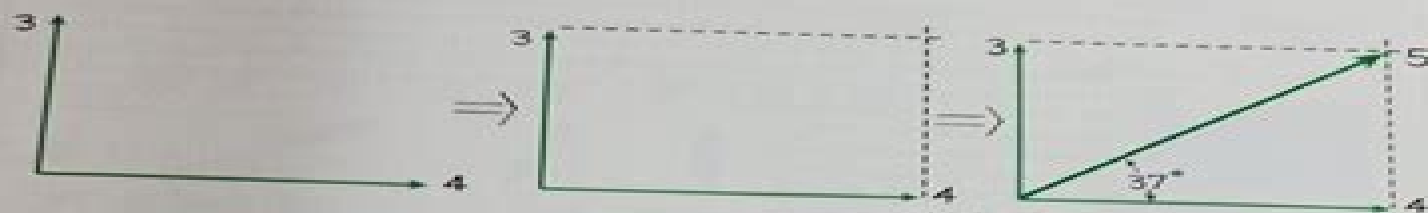

FIGURE 5.4 ▼

The 3-unit and 4-unit vectors add to produce a resultant vector of 5 units, at 37° from the horizontal.

⊗ The resultant of two perpendicular vectors is the diagonal of a rectangle constructed with the two vectors as sides. We learned this in Chapter 2. Here, the diagonal of the constructed rectangle measures 5 cm, which represents 100 km/h. So relative to the ground, the airplane moves 100 km/h northeasterly.^{5,2,1}

In Figure 5.4 we see a 3-unit vector at right angles to a 4-unit vector. Can you see that they make up the sides of a rectangle, and when added vectorially they produce a resultant of magnitude of 5? (Note that $5^2 = 3^2 + 4^2$.)

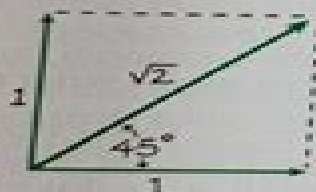

FIGURE 5.5

The diagonal of a square is $\sqrt{2}$, or 1.414, times the length of one of its sides.

In the special case of adding a pair of equal-magnitude vectors that are at right angles to each other, we construct a square, as shown in Figure 5.5. For any square, the length of its diagonal is $\sqrt{2}$, or 1.414, times either of its sides. Thus, the resultant is $\sqrt{2}$ times either of the vectors. For instance, the resultant of two equal vectors of magnitude 100 acting at right angles to each other is 141.4.^{5,2,2}

CONCEPT CHECK

What is the resultant of two perpendicular vectors?

think!

Suppose that an airplane normally flying at 80 km/h encounters wind at a right angle to its forward motion—a crosswind. Will the airplane fly faster or slower than 80 km/h?

Answer: 5.2

The

Paradigm Shift in Health Ronald S. Laura, Amy Chapman, 2009-03-31 In this book the authors show that the failure of public health arises not from a failure of contemporary medicine but from a failure of the philosophical assumptions upon which it rests By exposing the limits of this philosophical framework the authors suggest an alternative approach to health care one that derives from a profoundly ecological and holistic philosophy of nature They conclude that the advancement of community health depends on a comprehensive program of health education in which the responsibility for health is inextricably knit with a new consciousness of ecological stewardship The authors postulate a holistic epistemology in which knowing is directed towards participation with nature rather than separation from it
