1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .

- a. The net force on the crate is (zero) (greater than zero).
b. Evidence for this is no acceleration.

2. A slight pull P is exerted on the crate, not enough to move it.

- a. The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
b. The net force on the crate is (zero) (greater than zero).

3. Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction f is (less than) (equal to) (greater than) P .
b. Constant velocity means acceleration is (zero) (greater than zero).
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull P is further increased and is now greater than friction f .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
6. If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N? 1 m/s² 500 N? 5 m/s²

highlights the critical yet often overlooked role of education in combating climate change. It advocates for a transformative educational framework that integrates social emotional learning and interdisciplinary collaboration. Traditional education which focuses solely on factual knowledge is deemed insufficient. Instead education should foster empathy provide hands on experiences and encourage active engagement in climate solutions. The book outlines various ways education can drive climate action such as raising awareness preparing individuals for green jobs empowering communities and fostering innovation in higher education. It highlights the interconnectedness of climate change and education particularly for marginalised populations showing how quality education can enhance both mitigation and adaptation strategies while supporting Sustainable Development Goal SDG 4 and SDG 13. Key chapters discuss successful initiatives such as the Keep it Cool Climate Change Education KIC CCE project in South Africa and offer strategies for integrating climate change education into subjects like Natural Sciences and Geography. Ultimately the book positions education as a strategic tool for promoting sustainable development and building climate resilience. New research findings presented in the book connect education to climate change highlighting education as both a tool to address climate issues and a domain affected by these issues. The book integrates empirical evidence innovative theories and practical examples to ensure intellectual integrity and academic rigour. It introduces a unique framework that emphasises social emotional learning action oriented teaching and interdisciplinary collaboration. Case studies such as the KIC CCE initiative in South Africa illustrate these concepts. The book critiques traditional models and advocates for transformative approaches to climate education aligning with SDG 4 Quality Education and SDG 13 Climate Action. It also highlights the significance of teacher preparedness community empowerment gender equality and innovation providing valuable insights for scholars policymakers and practitioners addressing the climate crisis.
