- (c) The British thought surveys were important for effective administration. **True**

Let's discuss

Question 2:

What is the problem with the periodisation of Indian history that James Mill offers?

Answer 2:

- Although Hinduism is the religion of most of the Indians but Muslims had been living in India from much earlier than beginning of the Islamic rule in India. Even during the peak of the Mughal Empire, there were many territories which were ruled by Hindu kings.
- James Mill divided history on the basis of religion of the rulers of the times. However, a variety of faiths existed simultaneously in these periods.
- Mill, through his periodization suggested that British rule could civilize India. He thought that British should conquer all the territories in India to ensure the enlightenment as if India was not capable of progress without British coordination.

Question 3:

Why did the British preserve official documents?

Answer 3:

Official records of the British administration serve as important source of history of this period. The British rulers believed that every instruction, plan, policy, decision, agreement, investigation should be clearly written up. This was necessary for proper study and debate about an issue. Hence, they carefully preserved all official records and created several archives for the purpose.

Padalkar, Mythili Ramchand, Rafikh Shaikh, Indira Vijaysimha, 2022-07-26 The book presents key perspectives on teaching and learning science in India. It offers adaptive expertise to teachers and educators through a pedagogic content knowledge (PCK) approach. Using cases and episodes from Indian science classrooms to contextualise ideas and practices, the volume discusses the nature of science and aspects of assessments and evaluations for both process skills and conceptual understanding of the subject. It examines the significance of science education at school level and focuses on meaningful learning and development of scientific and technological aptitude. The chapters deal with topics from physics, chemistry and biology at the middle and secondary school levels and are designed to equip student teachers with theoretical and practical knowledge, abilities about science, science learning and the abilities to teach these topics along with teaching. The book draws extensively from research on science education and teacher education and shifts away from knowledge transmission to the active process of constructivist teaching-learning practices. The authors use illustrative examples to highlight flexible planning for inclusive classrooms. Based on studies on cognitive and developmental psychology, pedagogical content knowledge of science, socio-cultural approaches to learning science and the history and philosophy of science, the book promotes an understanding of science characterized by empirical criteria, logical arguments and sceptical reviews. With its accessible style, examples, exercises and additional references, it will be useful for students and teachers of science, science educators, BEd and MEd programmes for education, secondary and higher secondary school teachers, curriculum designers and developers of science. It will interest research institutes, non-governmental organisations, professionals and public and private sector bodies involved in science outreach, science education and teaching and learning practices. *NCERT Solutions for Class 8 Science*
