Environmental Ethics Bob Jickling, Heila Lotz-Sisitka, Lausanne Olvitt, Rob O'Donoghue, Ingrid Schudel, Dylan McGarry, Blair Niblett, 2021-12-07 This well constructed and highly original sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections The book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the Earth to make ethics an everyday activity not something left to experts and specialists Context based activities are presented in almost every chapter While it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action It walks on the ground and isn't afraid to get a little dirty or to seek joy in earthly relationships And it ultimately breaks with much Western academic tradition by framing ethics in a storied world thus making room to move beyond Euro American perspectives in environmental issues This work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices **The Oxford**

Debashis Guha, 2007 Environmental Ethics Kees Vromans, Rainer Paslack, Gamze Isildar, Rob de Vrind, Jürgen

Simon,2017-09-08 As the destructive consequences of environmental problems such as global warming water scarcity and resource and biodiversity destruction have been felt ever more heavily people are becoming more aware of the importance of and their responsibilities towards environmental protection The causes of our problems are anthropogenic The number of people working in what might be termed environmental industries or with environmental responsibilities in their day to day work has mushroomed In many cases however individuals charged with protecting the environment have a set of empirical priorities what is done rather than moral priorities which consider what should be done The need to harmonize environmental knowledge with ethical behaviour and thus achieve behavioural change and the internalization of environmentally ethical values has never been more urgent This book developed as part of an EU programme to diffuse the application of environmental ethics to decision making on pollution control is a response to the need for a restatement of environmental ethics and for a code of behaviour and set of values that can be internalised and adopted to guide the actions by individuals at the sharp end of protecting the environment decision makers and environmental experts executives staff working in municipalities and public government organisations throughout the EU and Turkey It is nothing short of an ethical training manual that will guide environmental experts decision makers in making sound judgements and decisions and will act as a bridge between environmental knowledge and environmental behaviour The book will be essential reading for decision makers and experts working in local authorities and governmental organisations with responsibility for environmental protection for both graduate and postgraduate students in environment related disciplines and for vocational education teachers with a focus on the environment

Emerson and Environmental Ethics Susan

Dunston,2018-09-15 At the core of Emerson s philosophy is his view as a naturalist that we are made of the same atoms as the world is In counterpoint to this identity he noted the fluid evolution and diversity of combinations and configurations of those atoms Thus he argued our relation and connection to the world are not occasional or recreational but everywhere and always and also reciprocal ongoing and creative He declared he would be a naturalist which for him meant being a

knowledgeable lover of nature Emerson's famous insistence on an original relation to the universe centered on morally creative engagement with the environment. It took the form of a nature literacy that has become central to contemporary environmental ethics. The essential argument of this book is that Emerson's integrated philosophy of nature ethics and creativity is a powerful prototype for a diverse range of contemporary environmental ethics. After describing Emerson's own environmental literacy and ethical aesthetic and creative practices of relating to the natural world, Dunston delineates a web of environmental ethics that connects Emerson to contemporary eco feminism, living systems theory, Native American science, Asian philosophy and environmental activism.

Topics on Environmental Ethics Maduka Enyimba, 2024-01-03 Seminar paper from the year 2023 in the subject Philosophy Practical Ethics Aesthetics Culture Nature Right University of Calabar Department of Philosophy course Environmental Ethics language English abstract This is a handbook on environmental ethics for students. It is a simple guide that introduces the students to some of the topical issues in environment philosophy. With this guide, students will now be spurred to read the major texts and authors in environmental ethics that have been referenced in the text. Students and teachers in environmental science philosophy, African philosophy and ethics will find this handbook very useful. The significance of evolving perspectives for environmental sustainability cannot be overemphasized. This is as a result of the damning consequences that environmental challenges are posing to the entire ecosystem. The African continent is not spared of the severe consequences that have come with an unhealthy relationship with the environment. This discourse seeks to undertake an exposition of the different African perspectives on the best form of relationship between humans and the environment. Pursuant to the fact that anthropocentric approaches have been held responsible for the many environmental crises evident today, perspectives from African environmental philosophers have proven to provide non anthropocentric alternatives. Using the exploratory approach, this work examines African environmental models, namely nature relatedness, eco bio communitarianism, ecology through Ubuntu and the ukama theory. The paper concludes that there is need for an eclectic model that will build on the strengths of the various perspectives since they all emphasize the communalist view that perfectly exemplifies traditional African worldview.

A New Environmental Ethics Holmes Rolston III, 2012-04-23 No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises. Now more than a decade into the next century, no one can ignore it. A New Environmental Ethics: the Next Millennium for Life on Earth offers clear, powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment. Rolston, an early and leading pioneer in studying the moral relationship between humans and the earth, surveys the full spectrum of approaches in the field of environmental ethics. This book, however, is not simply a judicious overview. Instead, it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future. As a result, this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in

environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for Environmental Science Eldon D. Enger, Bradley Fraser Smith, 2002 **Environmental Ethics** Joseph R. DesJardins, 1999 Publisher Description Acting for Endangered Species Shannon Petersen, 2002 An accessible political and legal history of the Endangered Species Act **Foundations of Environmental Ethics** Eugene C. An Environmental Proposal for Ethics Laura Westra, 1994-01-10 This original discussion breaks new ground by thoroughly analyzing ethical and aesthetic values centering on the concept of ecological integrity that apply intrinsically to nature and that govern our rightful use of the environment Those who have been waiting for an exciting account of the inherent structure and worth of ecological systems in relation to environmental policy will find it in this book Mark Sagoff Director of the Institute for Philosophy and Public Policy University of Maryland at College Park Environmental Ethics Louis P. Pojman, 2001 Organized into two main parts the first on theory and the second on applications the third edition of this popular anthology provides the most comprehensive set of readings available for environmental ethics and includes topic areas not covered in other anthologies The text follows a dialogic pro con format to present different and conflicting views on each topic Articles have been carefully selected for clarity and accessibility **Environmental Ethics**, 2007

Environmental Pollution and Control P. Aarne Vesilind, J. Jeffrey Peirce, Ruth F. Weiner, 1990 **Asian Population Studies Series**, 1993 **A Green and Permanent Land** Randal S. Beeman, James A. Pritchard, 2001 Once patronized primarily by the counterculture and the health food establishment the organic food industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public awareness of ecological issues Assumed by many to be a recent phenomenon that industry owes much to agricultural innovations that go back to the Dust Bowl era This book explores the roots and branches of alternative agricultural ideas in twentieth century America showing how ecological thought has challenged and changed agricultural theory practice and policy from the 1930s to the present It introduces us to the people and institutions who forged alternatives to industrialized agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a strong advocacy of economic justice for farmers Randal Beeman and James Pritchard show that agricultural issues were central to the rise of the environmental

movement in the United States As family farms failed during the Depression a new kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to farming In chronicling the overlooked history of alternative agriculture A Green and Permanent Land records the significant contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers considerable food for thought
