Resources in Education ,1982 *Reigniting Curiosity and Inquiry in Higher Education* Stacey L. MacKinnon, Beth Archer-Kuhn, 2023-07-03 How do you develop students capacities as independent learners build their confidence and motivation to identify their own research agendas and facilitate their critical thinking and research skills for effectively exploring their chosen topic Inquiry based learning IBL offers a proven means to achieve these outcomes IBL is a scaffolded learner centered student led approach to inquiry whereby students progressively design and lead their own inquiry process with support from the instructor It s a powerful pedagogical approach that you can progressively adopt first adopting it as an activity in a course to develop you and your students comfort with the practice right up to developing an entire course or program utilizing IBL It offers varying levels of engagement as you and your students gain familiarity with the practice from the instructor providing structured support to formative guidance as students gain confidence to a point where students become increasingly self directed and independent and are supported by the review of student peers and validated by presentations of their work to the class This pedagogy shifts the student instructor relationship with the former leading and the latter supporting IBL is a flexible teaching and learning approach that be can progressively adopted and developed without a specific formula and that positions students as co constructors of knowledge rather than passive recipients It is student driven creates engagement develops a curiosity mindset promotes group learning that is collaborative rather than competitive fosters metacognition and builds confidence as students learn to deal with ambiguity and risk Each chapter offers personal stories vignettes examples of practice and discussions of issues This book offers higher education instructors at any career stage and in any discipline a realistic guide to incorporating curiosity and inquiry based learning into their classrooms to promote long term knowledge creation and retention and life wide learning IBL is being increasingly adopted across the English speaking world Beyond its inherent capacity to promote independent learning it offers a perfect foundation for preparing students for Signature Work and capstone courses and is adaptable to small and large classes

Peace Education for Violence Prevention in Fragile African Societies Maphosa, Sylvester B., Keasley, Alphonse, 2019-02-10 Though conflicts among African nations diminished at the end of the last millennium the need for peace remains a perennial concern for African citizens within their communities and countries Once again Maphosa and Keasley have engaged a collection of scholar practitioners to address the query What s Going to Make a Difference in Contemporary Peace Education around Africa The contributing authors draw from daily headlines as well as African literature to unearth twenty first century quandaries with which educators in formal and informal contexts are called upon to grapple The What s Going to Make a Difference authors offer insights to educators peace education practitioners and parents for everyday living The authors probe the wisdom of the recent and ancient past and bring forth pearls for contemporary moments All in discerning effort to respond to the guiding question the editors and their contributing colleagues deliver a compelling set of

revelations for Making a Difference in Peace Education for African and world citizens *Becoming and Being a Physician*
 Shmuel P. Reis, Adina L. Kalet, W. Wayne Weston, 2025-04-14 What does I am a doctor mean currently Structured around
 personal stories this book provides a rigorous review of current thinking and research on the physician's life cycle The book
 considers the trajectories and factors that influence a doctor's development over decades of a medical career Taking an
 integrated approach the authors consider the formal stages of a physician's training including medical school residency
 training and practice and review discourses around professionalism competency based education lifelong learning expertise
 development reflection and narrative that merge into the construct of medical professional identity formation Reflecting the
 dramatic changes that have occurred in the physician's role job description and reality of modern clinical practice further
 compounded by the pandemic this new book will support and encourage medical educators to ensure that the enduring
 values of the medical profession prevail Engineering Education John Heywood, 2006-01-24 A synthesis of nearly 2 000
 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of
 engineering education over the years much of the published information has been restricted to scholarly journals and has not
 found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to
 help engineers become better educators devise more effective curricula and be more effective leaders and advocates in
 curriculum and research development The author's first objective is to provide an illustrative review of research and
 development in engineering education since 1960 His second objective is with the examples given to encourage the practice
 of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication
 is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology
 sociology determine the aims and objectives of the curriculum and the curriculum's internal structure which integrates
 assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content
 organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem
 based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching
 assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a
 brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers
 each chapter is self contained and may be read independently of the others Unlike other works in engineering education
 which are generally intended for educational researchers this publication is written not only for researchers in the field of
 engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the
 fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum
