

You need to determine where to place the beams so that the chairs are fastened to the roller coaster at a height of 20 feet.

3. Write the equation you would need to solve to find the horizontal distance each beam is from the origin. (10 points)

$$x = (20)^2 - (20)^2 \quad (\text{Horizontal Distance})$$

4. Algebraically solve the equation you found in step 3. Round your answer to the nearest hundredth. (10 points)

$$x = (20)^2 - (20)^2 \\ x = 0$$

5. Explain where to place the two beams. (10 points)

The beam goes 10.00 ft to the left of the center and another 10.00 ft to the right of the center.
The beams are 20.00 ft apart.

Model 2: Another plan to secure the roller coaster involves using a cable and strut. Using the center of the half-circle as the origin, the concrete strut can be modeled by the equation $y = -\sqrt{25x^2 + 16}$ and the mathematical model for the cable is $y = -x^2 - 4$. The cable and the strut will intersect.

Andrews,Richard Askey,Ranjan Roy,1999 An overview of special functions focusing on the hypergeometric functions and the associated hypergeometric series **Special Functions** Sergei I. Ural'evich Slavičnov,Wolfgang Lay,2000 The subject of this book is the theory of special functions not considered as a list of functions exhibiting a certain range of properties but based on the unified study of singularities of second order ordinary differential equations in the complex domain The number and characteristics of the singularities serve as a basis for classification of each individual special function Links between linear special functions as solutions of linear second order equations and non linear special functions as solutions of Painlevé equations are presented as a basic and new result Many applications to different areas of physics are shown and discussed The book is written from a practical point of view and will address all those scientists whose work involves applications of mathematical methods Lecturers graduate students and researchers will find this a valuable text and reference work
