The Solar System. Earth Science in Action. Teacher's Manual and Workbook Susan D. Echaore, 1982

The Science in Action series is designed to teach practical science concepts to special needs students It is intended to develop students problem solving skills by teaching them to observe record analyze conclude and predict This document contains a student workbook which deals with basic concepts about how the earth moves and its relationship to other planets and the sun Six separate units include 1 what is your space address 2 the planet we live on 3 our moon 4 our sun 5 our solar system and 6 exploring our solar system The units consist of basic introductory information and questions worksheets a self checking quiz and instructions for experiments A cumulative test is provided at the end of the workbook along with a glossary The teachers guide which is included explains how to use the workbook together with teaching suggestions and enrichment activities for each unit

TW *Investigating the Earth System: a Laboratory Manual in Applied Physical Geology* Steven T. Loduca, 2015-06-30

Investigating the Earth System provides a modern approach to teaching undergraduate introductory level Earth Science and Physical Geology laboratories with the aim of creating science savvy citizens capable and willing to make informed decisions about key environmental issues including where to live To achieve this end the manual integrates three novel design elements while still covering traditional topics such as rock and mineral identification surface and subsurface water resources and map reading and interpretation The first is to thoroughly and repeatedly engage students in all steps of the scientific method including data collection hypothesis construction and hypothesis testing By doing this in a highly conspicuous and intentional manner the effect is to instill the experiential learning necessary for individuals to think like Earth scientists as a matter of routine Second the activities promote the relevance of the material at nearly every turn by providing thought provoking queries based on real world examples Finally and most crucially the manual culminates in two capstone activities built on the guided inquiry approach These activities allow students to apply their hard won knowledge and skills to gather synthesize and analyze data obtained from publically accessible online databases thereby engaging in informed decision making centered on real world problems that pertain directly to Geology and Earth Science Notably these capstone activities have been fashioned so that they can be easily and quickly custom

tailored to meet local circumstances and interests To help ensure student success Investigating the Earth System is completely self contained All information necessary to complete each lab including fundamental underlying principles and concepts is provided on a just in time basis in the introduction to each lab activity In addition each lab is accompanied by a PreLab activity designed to allow students to hit the ground running when they enter the lab room Because of this approach most activities require little to no introduction in the lab room thereby making the most of limited lab time and in some cases allowing for two activities to be completed within the time constraints of a traditional lab session Investigating the Earth System now in its second edition is time tested and incorporates feedback from thousands of undergraduate students at Eastern Michigan University gathered over 25 years of continuous use A clear alternative to the traditional plug and chug method the 16 activities that comprise this manual are nonetheless easy and foolproof to apply in practice and are appropriate for majors and non majors alike

Discovery Problems in Earth Science Donald S. Stone,1966 Hands-On Earth Science Activities For Grades K-6 Marvin N. Tolman,2006-03-24 With more than 150 exciting hands on activities to teach students thinking and reasoning skills and basic science concepts and facts this book is the perfect complement to any elementary school science program Activities in the Earth Science volume covers air water weather earth ecology gravity and flight and celestial bodies The updated editions include an expanded teacher information section for all of the activities enhanced user friendliness inquiry based models and cooperative learning projects for the classroom Projects use materials easily found around the classroom or home provide science fair ideas at the end of each section link activities to national science standards and include other new material annual National Science Teachers Association meeting has taught elementary science methods courses at Brigham Young University since 1975
