2. Oceanography (study of the oceans)
3. Metamorphology (study of the Earth's internal structure)
4. Astronomy (study of the universe)
5. Environmental Science (study of the environment)

3. Answer Using

What is meant by the term "special creation"?

Special creation refers to the belief that the universe and all life were created by God in six days, as described in the Bible. This process is often contrasted with naturalistic evolution, which suggests that life evolved over billions of years through natural processes.

What are the four functions of a map?

The four functions of a map are to show location, distance, direction, and area. A map also provides information about the physical features of a region, such as mountains, rivers, and cities.

Give an example of an earth science technology and which branch of earth science it would come from.

An example of an earth science technology is a seismograph, which is used to detect and measure earthquakes. This technology comes from the branch of geology, specifically seismology, which studies seismic waves and Earth's internal structure.

What is naturalism? Explain with some detail.

Naturalism is the belief that everything in the universe, including the Earth and life, can be explained solely through natural processes and laws without the involvement of supernatural forces or divine creation. It assumes that the universe operates according to consistent scientific principles that can be observed, tested, and explained through empirical evidence. In the context of Earth science, naturalism underpins the old Earth theory, suggesting that geological features formed gradually over billions of years through processes like evolution, plate tectonics, and erosion, rejecting any role for miracles or special divine intervention in the natural world.

Fill in the Chart Compare and Contrast Young and Old Earth Theories

Aspect	Young Earth	Old Earth
Age of Earth	Approximately 6,000 to 10,000 years old, based on biblical chronologies.	Approximately 4.5 billion years old, determined by radiometric dating.
How Earth Came to Be	Created directly by God in a 24-hour day through supernatural acts, as described in Genesis.	Formed gradually through natural processes like the Big Bang, formation of cosmic dust, and planetary differentiation over billions of years.
Reasoning/Evidence	Fossil formation, natural disasters.	Carbon dating, earth processes appear slow.
