

Dremel

A **rotary tool** (more commonly referred to by the brand name "**dremel**") is used for grinding away material, usually metal but it can be used for hard woods and plastics as well. The tip of the dremel spins at a very high speed, up to 35,000 revolutions per minute. Different attachments can be used to achieve different effects.

SAFETY

- **Shop Buddy:** You are not allowed to work alone while using the dremel. A buddy is there to ensure your safety and to call for help if needed. Your buddy *does not have to be trained* on the tool, but if untrained, they are not allowed to use the equipment.
- **Eye Protection:** The dremel can send sawdust, wood chips and other fragments flying – safety glasses protect your eyes from harmful material.
- **Close-Toed Shoes:** Tools, pieces of wood and other sharp objects can fall and close-toed shoes will protect your feet from cuts, bruises and even breaks.
- **Long Pants:** Long pants will protect your legs from cuts, bruises and splinters that might come from handling wood.
- **No Jewelry:** Rings, bracelets, dangling necklaces, watches, headphones and sweatshirt strings can all get caught in the spinning disc, which can drag you into the machine.
