Captured Landscape Paradox Enclosed Garden

Marcio Doctors, Iole de Freitas

Captured Landscape Paradox Enclosed Garden:

Captured Landscape Kate Baker, 2012 The enclosed garden or hortus conclusus is a place where architecture architectural elements and landscape come together It has a long history ranging from the paradise garden and cloister the botanic garden and the giardini segreto the kitchen garden and the stage for social display to its many modern forms the city retreat the redemptive garden and the deconstructed building By its nature it is ambiguous Is it an outdoor room or captured landscape is it garden or architecture Kate Baker discusses the continuing relevance of the typology of the enclosed garden to contemporary architects by exploring influential historical examples alongside some of the best of contemporary designs brought to life with vivid photography and detailed drawings taken mainly from Britain the Mediterranean Japan and South America She argues that understanding the potential of the enclosed garden requires us to think of it as both a design and an experience As climate change becomes an increasingly important component of architectural planning the enclosed garden which can mediate so effectively between interior and exterior provides opportunities for sustainable design and closer contact with the natural landscape Study of the evolution of enclosed gardens and the concepts they generate is a highly effective means for students to learn about the design requirements of outdoor space proximal to the built environment Captured Landscape provides architectural design undergraduates and practising architects with a broad range of information and design possibilities It will also appeal to landscape architects horticulturalists and a wider audience of all those who are interested in garden design

California Mission Landscapes Elizabeth Kryder-Reid, 2016-11-30 Nothing defines California and our nation's heritage as significantly or emotionally says the California Mission Foundation as do the twenty one missions that were founded along the coast from San Diego to Sonoma Indeed the missions collectively represent the state's most iconic tourist destinations and are touchstones for interpreting its history Elementary school students today still make model missions evoking the romanticized versions of the 1930s Does it occur to them or to the tourists that the missions have a dark history California Mission Landscapes is an unprecedented and fascinating history of California mission landscapes from colonial outposts to their reinvention as heritage sites through the late nineteenth and twentieth centuries Illuminating the deeply political nature of this transformation Elizabeth Kryder Reid argues that the designed landscapes have long recast the missions from sites of colonial oppression to aestheticized and nostalgia drenched monasteries She investigates how such landscapes have been appropriated in social and political power struggles particularly in the perpetuation of social inequalities across boundaries of gender race class ethnicity and religion California Mission Landscapes demonstrates how the gardens planted in mission courtyards over the past 150 years are not merely anachronistic but have become potent ideological spaces The transformation of these sites of conquest into physical and metaphoric gardens has reinforced the marginalization of indigenous agency and diminished the contemporary consequences of colonialism And yet importantly this book also points to the potential to create very different visitor experiences than these

landscapes currently do. Despite the wealth of scholarship on California history until now no book has explored the mission landscapes as an avenue into understanding the politics of the past tracing the continuum between the Spanish colonial period, emerging American nationalism and the contemporary heritage industry. *The United States of Medievalism* Tison Pugh, Susan Aronstein, 2021-08-31. The United States of Medievalism contemplates the desires, dreams and contradictions inherent in experiencing the Middle Ages in a nation that is so temporally, spatially and at times politically removed from them. The European Middle Ages have long influenced the national landscape of the United States through the medieval sites that permeate its self-announced republican landscapes and cities. Today American built medievalisms continue to shape the nation's communities collapsing the binaries between past and present medieval and modern European and American. The volume's chapters visit the nation's many medieval inspired spaces from Sherwood Forest in Texas to California's San Andreas Fault. Stops are made in New York City's churches, Boston's gardens, Philadelphia's Bryn Athyn Cathedral, Orlando's Magic Kingdom, Appalachian highways, Minnesota's Viking Villages, New Orleans's Mardi Gras and the Las Vegas Strip. As the editors and their fellow essayists take the reader on this cross-country trip across the United States they ponder the cultural work done by the nation's medievalized spaces. In its exploration of a seemingly distant period, this collection challenges the underexamined legacy of medievalism on the western side of the Atlantic. Full of intriguing case studies and reflections, this book is informative reading for anyone interested in the contemporary vestiges of the Middle Ages. **Architecture and the Senses in the Italian Renaissance** David Karmon, 2021-05-27. This is the first study of Renaissance architecture as an immersive multisensory experience that combines historical analysis with the evidence of first-hand accounts. Questioning the universalizing claims of contemporary architectural phenomenologists, David Karmon emphasizes the infinite variety of meanings produced through human interactions with the built environment. His book draws upon the close study of literary and visual sources to prove that early modern audiences paid sustained attention to the multisensory experience of the buildings and cities in which they lived. Through reconstructing the Renaissance understanding of the senses, we can better gauge how constant interaction with the built environment shaped daily practices and contributed to new forms of understanding. *Architecture and the Senses in the Italian Renaissance* offers a stimulating new approach to the study of Renaissance architecture and urbanism as a kind of experiential trigger that shaped ways of both thinking and being in the world. Constructing Gardens, Cultivating the City Amanda Shoaf Vincent, 2023-05-16. *Constructing Gardens, Cultivating the City* is the first cultural history of major new parks developed in Paris in the late twentieth century as part of the city's program of adaptive reuse of industrial spaces. Thanks to laws that gave the city more political autonomy, Paris's local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium. The parks in this book represent this campaign and illustrate different facets of their cultural and historical context. Archival research, interviews and analyses of the parks reveal how postmodern debates about urban planning, the historic city, public space and

nature's presence in an urban setting influenced their designs. In sum, the city adopted the garden as a model for public parks investing in complex, richly symbolic and representational spaces. These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris's role as a world city. The parks development process often included points of conflict pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined. These parks demonstrate the ongoing cultivation of the city over time in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning. They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing. Just as the Luxembourg Gardens, the Tuileries and the Buttes Chaumont parks exemplify their era's cultural dynamics, such parks as the Jardin Atlantique, Parc André Citroën and the Jardin des Halles express contemporary French culture within the archetypal space of their era, the city. Finally, they point the way to current trends in landscape architecture such as citizen gardening and ecological initiatives.

The Duncan Campbell Scott Symposium K. P. Stich, 1980-01-01 Hunger for the Wild Michael L. Johnson, 2007 Americans have had an enduring yet ambivalent obsession with the West as both a place and a state of mind. Michael L. Johnson considers how that obsession originated, how it has determined attitudes toward and activities in the West and how it has changed over the centuries.
