Car Paint Spraying Problems:

Automotive Painting Technology Kimio Toda, Abraham Salazar, Kozo Saito, 2012-12-21 This book offers unique and valuable contributions to the field. It offers breadth and inclusiveness. Most existing works on automotive painting cover only a single aspect of this complex topic such as the chemistry of paint or paint booth technology. Monozukuri and Hitozukuri are Japanese terms that can be translated as making things and developing people but their implications in Japanese are richer and more complex than this minimal translation would indicate. The Monozukuri/Hitozukuri perspective is drawn from essential principles on which the Toyota approach to problem solving and continuous improvement is based. From this perspective, neither painting technology R D nor painting technology use in manufacturing can be done successfully without integrating technological and human concerns involved with making and learning in the broadest sense as the hyphen is meant to indicate. The editors provide case studies and examples drawn from Mr. Toda's 33 years of experience with automotive painting at Toyota and from Dr. Saito's 18 years experience with IR4TD, the research for development group he leads at the University of Kentucky that give details on how these two principles can be integrated for successful problem solving and innovation in industry, in university R D and in the collaboration between the two. The book will bring readers up to date on progress in the field over the last decade to provide a basis for and to indicate fruitful directions in future R D and technology innovation for automotive painting.

Automotive Paint from Prep to Final Coat JoAnn Bortles, 2014-07-15 DIV Solvent based paints have been used in automotive applications since the days when automobiles were called buggies and the horsepower was provided by well horses. But recent EPA regulations have restricted solvent based paints for use only in approved professional paint booths, meaning that do it yourselfers can no longer use them and it won't be long before their use is banned entirely. Paint manufacturers have raced to develop water based paints as a replacement for the solvent based paints previously used. These new water based automotive paints are of very high quality but they require different methods and techniques for proper application, virtually rendering previous automotive paint books obsolete. *Automotive Paint from Prep to Final Coat* is the first book to provide instruction in these new paints.
